❖ Theme Guide ❖

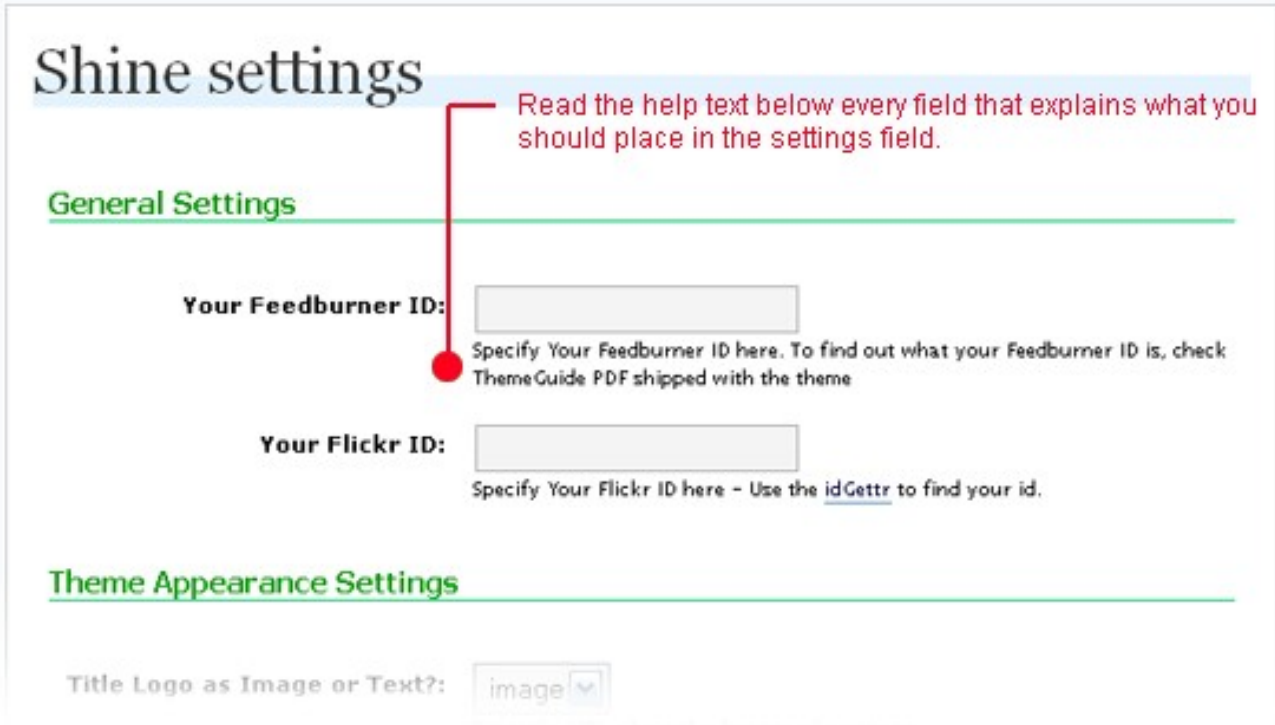

Written by [R.Bhaves](#)

❖ How to Install the theme?

1. Upon receiving the theme package, unzip the theme pack. For example, you purchased “Shine” theme.
2. You will have following files and folders
 - a. Shine
 - b. ThemeGuide.pdf
 - c. Logo PSD
 - d. License
3. So, Shine is actual theme folder. Upload this folder in wpcontent/themes/ folder.
4. Log in to your WordPress admin panel and go to Presentation where you will have screenshots of the themes in your themes directory.
5. Click on the Shine theme to activate it
6. Done!
7. To customize theme looks, look at the Theme Admin Options below.

❖ Theme Admin Options

1. Upon activating the theme, from your wordpress admin panel > Presentation > Themes section, you will notice “Current Theme Options” tab.
2. Click on it.
3. You will have a form with many options with text boxes and dropdown menus. If you can't figure out what the field is about, check the help tip below each field. Your current theme options page should look something like this..

4. This theme options is one of the primary features of the themes by premiumthemes.net where you could customize the basic look and feel, add feedburner, flickr Ids, you could increase decrease width, alignment, background, text, sidebar position etc. from here itself. No need to dirty your hand with the css modifications!
5. Once done, click on the Save Changes button and your theme is ready to go!
6. If you messed up something, don't worry. Click Reset button and it will come back to the normal position again.

❖ How to Change LogoImage?

1. If you have selected Image as logo title in current theme options and want to change logo image, create logo.png file with your desired image.
2. In images folder, replace it with current logo.png file.
3. If you want to change height/width of the logo, open style.css
4. look for this code.. #header-in .logo-image {
5. Under this, specify width/height of the logo as per your wish.

❖ Set Custom Page as Homepage

If your theme includes a custom home page template too, use for your blog and use it as a website. Upon installing the theme the site shows common, default blog look.

Custom template for a page

If you wish to use one of the templates as homepage.. here's how to do it.

1. Log in to your wordpress admin panel.
2. Click on Write > Write Page.
3. Enter the Page title of your choice e.g. "Home"
4. Look at the right panel block options.
5. In Page Template Box, click on the drop down.
6. Select the template of your choice. e.g. "Home Page"
7. Click Publish.
8. Done!

When you preview your website, it will show the selected template in the "home" page we created.

Now, let us see how to set the "Home" as a default homepage of your site. I.e. when a user visits your website, the page with "home" template should be displayed by default.

Set a custom template/page as Homepage in your blog

Here's few simple steps that will let you select a page template as homepage.

1. In your wordpress admin panel, click on "Options".
2. Select "Reading" option.
3. In Front Page Displays section, you have two radio button options. 1. "Your latest posts" and 2. "A static page". By default "Your latest posts" is selected
4. To have a custom page as homepage, select "A Static Page"
5. Here, you have two options. "Front page" and "Posts Page".
6. In "Front Page" drop down option, we will select "Home" page we created above.
7. At the bottom of this page, click "Update Options" button.
8. Done!

Preview your blog website. The "Home" page is set by default as homepage of your site.

❖ How to change about text in the theme?

If your theme displays about block as well, open **about.txt** file in notepad from your theme folder. Edit this file as per your wish and that's it!

❖ How to change Favicon?

In your theme's root folder, there is a favicon.ico file. If you want to change it with your logo, generate a .ico file and replace it with existing one. (you can create a favicon file online from : <http://tools.dynamicdrive.com/favicon/>)

❖ Which plugins are compatible/Integrated in the theme?

All the themes at premiumthemes.net are tested and compatible with

PageNavi

FlickrRSS

Gravatar

Post-Rating

ShareThis

Also it should be compatible with other plugins as themes are built the normal way the themes are built for WordPress.

❖ What's my feedburner ID?

1. Go to the feedburner homepage and click "sign in".
2. Click on the feed you want to find the ID for.
3. Once you've clicked the feed you're interested in, take a look at your address bar. It should have a URL in it like this one: <http://www.feedburner.com/fb/a/dashboard?id=1148202>
4. Notice the string of numbers after "id=" ? That is your feedburner ID for that particular feed. **In above case, the ID is "1148202"**

❖ What's Next?

Resources: Subscribe to PremiumThemes.net's RSS feed and stay updated on all the upcoming news, new paid and free theme releases, and more. Don't forget to check at
