how artists wield demonstration to question the status quo both aesthetically and politically marshaling art and education as powerful agents of change demonstration in short says see here it is the practice of pointing to something in order to explain or contest it as such sven spieker argues that demonstration has helped reshape art from the height of the cold war to the late twentieth century reformatting our understanding of how art and political engagement relate to each other focusing on western europe especially germany eastern europe and the united states art as demonstration expands on contemporary discussions of art as protest activism and resistance spieker shows how a closer more historical look at art s connection with demonstration reconnects us with earlier efforts notably by the early twentieth century avant garde to marshal art for the purpose of instruction and engagement art as demonstration reconceives the history of postwar art in eastern and western europe from the perspective of demonstration understood formally as a technique for showing and pointing as well as politically as protest resistance etc close analyses of individual artworks reveal how the deployment of demonstration has changed over time spieker shows how protest and resistance organize art and artists not only politically but also and especially

formally and aesthetically a development of particular importance in the cold war art and politics of eastern europe the book illustrates how from the 1960s onward demonstration radically changed the way artists thought about art no longer as an object but as a form of education
