how artists wield demonstration to question the status quo both aesthetically and politically  
marshaling art and education as powerful agents of change demonstration in short says see  
here it is the practice of pointing to something in order to explain or contest it as such sven  
spieker argues that demonstration has helped reshape art from the height of the cold war to  
the late twentieth century reformatting our understanding of how art and political  
engagement relate to each other focusing on western europe especially germany eastern  
europe and the united states art as demonstration expands on contemporary discussions of art  
as protest activism and resistance spieker shows how a closer more historical look at art's  
connection with demonstration reconnects us with earlier efforts notably by the early  
twentieth century avant garde to marshal art for the purpose of instruction and engagement  
art as demonstration reconceives the history of postwar art in eastern and western europe  
from the perspective of demonstration understood formally as a technique for showing and  
pointing as well as politically as protest resistance etc close analyses of individual artworks  
reveal how the deployment of demonstration has changed over time spieker shows how  
protest and resistance organize art and artists not only politically but also and especially

formally and aesthetically a development of particular importance in the cold war art and politics of eastern europe the book illustrates how from the 1960s onward demonstration radically changed the way artists thought about art no longer as an object but as a form of education
