in developed countries like the united states germany and the uk it has been observed that workers who perform non routine activities either cognitive or manual have benefited in terms of employment and income while those performing routinary tasks have seen their job prospects and wages decline this has led to not only a polarization of the labor markets but also a decrease in certain measures of inequality this phenomenon has been attributed to task based technological change tbtc which differs from the skilled biased technological change in the fact that not only highly skilled workers have benefited from technology advancement this book presents evidence of how digitalization and tbtc are affecting the labor markets of different regions of the world and examines the factors that cause this inequality among nations it examines recent issues around the effect of tbtc on the labor market and the economy in general with a comparison of different countries in central and eastern europe north america and latin america as well as in other regions of the world the incorporation of these regions presents relevant particularities for the subject matter addressed

in the book the book also considers questions such as how labor market effects differ by gender and what the impact of digital skills on employment inequalities and public policies might be in so doing it identifies the advances opportunities and changes that have taken place while also making public policy proposals this book will be a key reading to the global community of graduate students and researchers in the field of economics and specifically in the study of labor markets

where to find employment leads and other job search resources
