excerpt from public relief and private charity i have compiled this little book because i believe some such restatement of the principles upon which the modern methods of charity are based is needed there is not perhaps an original thought or suggestion in it an important part of it is direct and verbal quotation and to every student of the subject it will be apparent that almost the whole of it is taken from the writings of wise men and women who have lived during the past hundred years yet i do not apologize for offering it to my fellow workers and the public for there is nowhere a small book in which the principles underlying our science can be found clearly stated i speak of our science because fortunately the task of dealing with the poor and degraded has become a science and has its well defined principles recognized and conformed to more or less closely by all who really give time and thought to the subject from all parts of the world the testimony of the experts is the same and it is this fact which makes our task so encouraging we have set ourselves to work to strengthen such as do stand to comfort and help the weak hearted and to raise up those who fall and to have found out how this is to be done is to have taken one step at least toward success about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
