The International Migration Outlook 2017, the 41st edition of this annual OECD publication, analyses recent developments in migration movements and policies in OECD countries and selected non-member countries where relevant. It examines the impact of the recent increase in humanitarian migration, it looks at the evolution of the labour market outcomes of immigrants in OECD countries with a focus on the medium-term dynamic of employment outcomes and on the implications of structural changes in the labour market. It includes one special chapter on family migrants looking at this important part of migration and the policies that govern it. A statistical annex completes the book.

In the context of Turkey's accession to the EU, the issue of potential migration from Turkey and its impact upon European labor markets became one of the concerns of the EU. Considering Turkey's growing population and young labor force, in 2011 half a century after the bilateral agreement between Turkey and Germany on labor recruitment in 1961, migration plays a key role in relations of Turkey with the EU and will even increase its significance. Not necessarily for the next fifty years but certainly for the next decade, this book touches upon various aspects of the ongoing debate about the effects of Turkey's accession to the EU upon the migration flows and sheds light on various dimensions of the current panorama, addresses policy implications as well as future challenges and opportunities.
