i l overview for instructors the purpose of this text is to provide an introduction to the problem  
solving capabilities of fortran 90 the intended audience is undergraduate science and engineering  
students who have not previously taken a formal programming course the focus is on the process  
of solving computational problems of interest to scientists and engineers rather than on  
programming per se which has several important implications for the contents of the text as  
outlined later in the preface fortran has long been favored as an introductory programming  
language for engineering and science students because of its historical roots and continued  
prominence in the professional practice of these disciplines the fortran 77 standard has been  
taught within an essentially mainframe context to an entire generation of scientists and engineers  
however many of the science and engineering calculations that a generation ago could be done  
only on mainframe computers can now be done on desktop computers often using applications  
that don t require any programming at all
