in 1997 eisenbrauns published the highly regarded two volume phonologies of asia and africa edited by alan kaye with the assistance of peter t daniels and the book rapidly became the standard reference

for the phonologies of the afro asiatic languages now the concept has been extended and kaye has assembled nearly 50 scholars to write essays on the morphologies of the same language group the coverage is complete copious and again will likely become the standard work in the field contributors are an international who s who of afro asiatic linguistics from appleyard to leslau to voigt it is with great sadness that we report the death of alan kaye on may 31 2007 while these volumes were in the final stages of preparation for the press alan was diagnosed with bone cancer on may 1 while on research leave in the united arab emirates and was brought home to fullerton by his son on may 22

research into cross linguistic aspects and typology of word formation has not been paid relevant and systematic attention by morphologists and only a few articles dealing with various word formation issues of this kind appear in journals the chapters in this volume address this issue by discussing on contrastive principles important questions of word formation in a sample of 26 languages the focus of the book as a whole is on typological features of word formation in the languages sampled it is aimed at researchers that have an interest in word formation in a variety of languages

the siouan family comprises some twenty languages historically spoken across a broad swath of the central north american plains and woodlands as well as in parts of the southeastern united states in spite of its geographical extent and diversity and the size and importance of several siouan speaking tribes this family has received relatively little attention in the linguistic literature and many of the individual siouan languages are severely understudied this volume aims to make work on siouan languages more broadly available and to encourage deeper investigation of the myriad typological theoretical descriptive and pedagogical issues they raise the 17 chapters in this volume present a broad range of current siouan research focusing on various siouan languages from a variety of linguistic perspectives historical genetic philological applied descriptive formal generative and comparative typological the editors preface summarizes characteristic features of the siouan family including head final and verb centered syntax a complex system of verbal affixes including applicatives and subject possessives head internal relative clauses gendered speech markers stop systems including ejectives and a preference for certain prosodic and phonotactic patterns the volume is dedicated to the memory of professor robert l rankin a towering figure in siouan linguistics throughout his long career who passed away in february of 2014
