foundations of higher dimensional category theory for graduate students and researchers in mathematics and mathematical physics

intended for category theorists and logicians familiar with basic category theory this book focuses on categorical model theory which is concerned with the categories of models of infinitary first order theories called accessible categories the starting point is a characterization of accessible categories in terms of concepts familiar from gabriel ulmer s theory of locally presentable categories most of the work centers on various constructions such as weighted bilimits and lax colimits which when performed on accessible categories yield new accessible categories these constructions are necessarily 2 categorical in nature the authors cover some aspects of 2 category theory in addition to some basic model theory and some set theory one of the main tools used in this study is the theory of mixed sketches which the authors specialize to give concrete results about model theory many examples illustrate the extent of applicability of these concepts in particular some applications to topos

theory are given perhaps the book s most significant contribution is the way it sets model theory in categorical terms opening the door for further work along these lines requiring a basic background in category theory this book will provide readers with an understanding of model theory in categorical terms familiarity with 2 categorical methods and a useful tool for studying toposes and other categories

this book investigates the situated re production of categories from the most mundane and unremarkable to those most strongly associated with power and privilege by examining the reciprocal relationships between categorial phenomena and the basic structures and practices of social interaction the book provides a new framework for integrating conversation analysis and membership categorization analysis across its ten chapters the book describes a conversation analytic approach to studying categories and categorization charts the development and history of membership categorization analysis and addresses core methodological challenges and practices associated with using this approach after mapping out the new framework developed in the book each chapter describes intersections between categorial phenomena and the domains that comprise the infrastructure of social interaction the book concludes by exploring applications interventions and impacts of understanding categories in ways examined across the preceding chapters and by considering future avenues for excavating categorial practices in the ordinary institutional and technological settings of human social life categories in social interaction is essential reading for social scientists with an interest in categories of people and categorizing practices and especially for practitioners and students of conversation analysis membership categorization ethnomethodology and discursive psychology
