integrating graphics and vision for object recognition serves as a reference for electrical engineers and computer scientists

researching computer vision or computer graphics computer graphics and computer vision can be viewed as different sides of the same coin in graphics algorithms are given knowledge about the world in the form of models cameras lighting etc and infer or render an image of a scene in vision the process is the exact opposite algorithms are presented with an image and infer or interpret the configuration of the world this work focuses on using computer graphics to interpret camera images using iterative rendering to predict what should be visible by the camera and then testing and refining that hypothesis features of the book include many illustrations to supplement the text a novel approach to the integration of graphics and vision genetic algorithms for vision innovations in closed loop object recognition integrating graphics and vision for object recognition will be of interest to research scientists and practitioners working in fields related to the topic it may also be used as an advanced level graduate text

biosemiotics bios life and semion sign is an interdisciplinary science that studies communication and signification in living systems communication is the essential characteristic of life an organism is a message to future generations that specifies how to survive and reproduce any autocatalytic system transfers information ie initial conditions to its progeny so that daughter systems will eventually reach the same state as their parent self reproducing systems have a semantic closure because they define themselves in their progeny a sign defined in a broadest sense is an object that is a part of some self reproducing system a sign is always useful for the system and its value can be determined by its contribution to the reproductive value of the entire system the major trend in the evolution of signs is the increase of their complexity via development of new hierarchical levels ie metasystem transitions this book presents new research in this dynamic field
