Owen's analytical key to the Old Testament provides complete parsing of every word of the Hebrew text. This is a valuable set for anyone wanting to do detailed analysis of the OT.

This book examines the role of hook-up apps in the lives of gay, bi, trans, and queer immigrants and refugees and how the online culture of these platforms promotes belonging or exclusion within the context of the so-called European refugee crisis. This research focuses on the experiences of immigrants from especially Muslim majority countries to the greater Copenhagen area, a region known for both its progressive ideologies and its anti-immigrant practices. Grindr and similar platforms connect newcomers with not only dates and sex but also friends, roommates, and other logistical contacts. But these socio-sexual platforms also become spaces of racialization and othering. Weaving together analyses of real Grindr profile texts, immigrant narratives, political rhetoric, and popular media, immigrants on Grindr provides an in-depth look at the complex interplay between online and offline cultures and between technology and society.

Today's need to know optimization techniques at your fingertips: The use of optimization methods is familiar territory to academicians and researchers. Yet in today's world of deregulated electricity markets, it's just as important for electric power professionals to have a solid grasp of these increasingly relied-upon techniques. Making those techniques readily accessible is the hallmark of optimization principles: practical applications to the operation and markets of the electric power industry. With deregulation, market rules and economic principles dictate that commodities be priced at the marginal value of their production. As a result, it's necessary to work with ever more sophisticated algorithms using optimization techniques, either for the optimal dispatch of the system itself or for pricing commodities and the settlement of markets. Succeeding in this new environment takes a good understanding of methods that involve linear and nonlinear optimization, including optimal power flow, locational marginal prices for energy, and the auction of hedging instruments.
