the relationship between philosophy and art has always been a close one and today's conceptual art draws heavily on ideas and concepts from the philosophical field. Osborne and Co introduce the reader to a wide variety of key ideas and showcase the work of over 20 artists whilst explaining the relationship between the two with an introduction by Richard Osborne, author of the internationally bestselling *Philosophy for Beginners*. This is a useful introduction to a complicated field for all arts students and the general reader, illustrated throughout in colour.

Drawing on the philosophies of art developed by the continental authors and studies of Anglo-American philosophers, this book presents a panorama of the philosophy of art. It discusses definitions offered from the analytical school including Arthur Danto's representationalism, Dipert's theories of artefactualism, Dickie's institutional and procedural theories, and Levinson's historical and cultural theories. From the continental theories, it reflects on Hegel's notion of philosophy of art, Martin Heidegger's and Hans-Georg Gadamer's hermeneutic tradition, and Alexius Meinong's theory of objects. This range of definitions and theories are judged and defended using a form of representationalism that begins with the results of Arthur Danto's thinking and integrates the aesthetic reflection of the Baumgarten school. The result is not only a presentation of philosophy of art from the beginning of the twentieth century to present day, but a study that proposes a theory capable of synthesizing the finest contributions of the analytic and continental traditions.

The philosophy of art is a highly accessible introduction to current key issues and debates in aesthetics and philosophy of art. Chapters on standard topics are balanced by topics of interest to today's students, including creativity, authenticity, cultural appropriation, and the distinction between popular and fine art. Other topics include emotive expression, pictorial representation, definitional strategies, and artistic value. Presupposing no prior knowledge of philosophy, Theodore Gracyk draws on three decades of teaching experience to provide a balanced and engaging overview, clear explanations, and many thought-provoking examples. All chapters have a strong focus on current debates in the field, yet historical figures are not neglected. Major current theories are set beside key ideas from Plato, Aristotle, Kant, Marx, and Hegel. Chapters conclude with advice on further readings, and there are recommendations of films that will serve as a basis for further reflection and discussion. Key ideas are immediately accompanied by exercises that will test students' reactions and understanding. Many chapters call attention to ideology, prejudices, and common clichés that interfere with clear thinking. Beautifully written and thoroughly comprehensive, *The Philosophy of Art* is the ideal resource for anyone who wants to explore recent developments in philosophical thinking about the arts. It also provides the

in the twentieth century avant garde movements have pushed the concept of art far beyond its traditional boundaries in this dynamical process of constant renewal the prestige of thinking about art as a legitimizing practice has come to the fore so it is hardly surprising that the past decades have been characterized by a revival or even breakthrough of philosophy of art as a discipline however the majority of books on aesthetics fail to combine a systematical philosophical discourse with a real exploration of art practice thinking art attempts to deal with this traditional shortcoming it is indeed not only an easily accessible and systematic account of the classical modern and postmodern theories of art but also concludes each chapter with an artist's studio in which the practical relevance of the discussed theory is amply demonstrated by concrete examples moreover each chapter ends with a section on further reading in which all relevant literature is discussed in detail thinking art provides its readers with a theoretical framework that can be used to think about art from a variety of perspectives more particularly it shows how a fruitful cross fertilization between theory and practice can be created this book can be used as a handbook within departments of philosophy history of art media and cultural studies cultural history and of course within art academies though the book explores theories of art from plato to derrida it does not presuppose any acquaintance with philosophy from its readers it can thus be read also by artists art critics museum directors and anyone interested in the meaning of art

what makes something a work of art this is the question that philosopher arthur c danto asked himself after seeing andy warhol's brillo box at a 1964 exhibition at the stable gallery in new york city the philosophy of art was not danto's primary area of inquiry at the time but warhol's work prompted him to return to this question over several decades danto delivered the previously unpublished lectures presented in this volume at the acadia summer arts program kippy's kamp on mount desert island maine from 1997 through 2009 they explain the ideas that he set forth in professional philosophical papers and books which described his philosophy of art informal yet deeply thought provoking these lectures explore how danto has analyzed art through a philosophical lens yielding an approach that different from most other contemporary art criticism danto's though on art go beyond formal analysis and taste judgments instead focusing on questions about the nature of art and attempting to define what

a work of art is these lectures present some of his most notable ideas in terms that those with no training in philosophy can understand tiré de la jaquette
