section i in 1972 donald davison and gilbert hannan wrote in the introduction to the volume semantics of natural language the success of linguistics in treating natural languages as formal syntactic systems has aroused the interest of a number of linguists in a parallel or related development of semantics for the most part quite independently many philosophers and logicians have recently been applying formal semantic methods to structures increasingly like natural languages while differences in training method and vocabulary tend to veil the fact philosophers and linguists are converging it seems on a common set of interrelated problems davidson and harman called for an interdisciplinary dialogue of linguists philosophers and logicians on the semantics of natural language and during the last ten years such an enterprise has proved extremely fruitful thanks to the cooperative effort in these several fields the last decade has brought about striking progress in our understanding of the semantics of natural language this work on semantics has typically paid little attention to psychological aspects of meaning thus psychologists or computer scientists working on artificial intelligence were not invited to join the forces in the influential introduction of semantics of natural language no doubt it was felt that while psychological aspects of language are important in their own right they are not relevant to our immediate semantic concerns in the last few years several linguists and logicians have come to question the fundamental anti psychological assumptions underlying their theorizing

when did drawing become an integral part of architecture among several architects and artists who brought about this change during the renaissance francesco di giorgio martini's ideas on drawing recorded in his trattati di architettura ingegneria e arte militare 1475 1490 are significant francesco suggests that drawing is linked to the architect's imagination and central in conveying images and ideas to others starting with the broader edges of francesco's written work and steadily penetrating into the fantastic world of his drawings the book examines his singular formulation of the act of drawing and its significance in the context of the renaissance the book concludes with speculations on how francesco's work is relevant to us at the onset of another major shift in architecture caused by the proliferation of digital media

this account of six families whose children were wrongly seized by child protection services vividly illustrates the constitutional balancing act where medicine family interests and child safety can clash they took the kids last night shows a rarely exposed side of america's contemporary struggle to address child abuse telling the stories of loving families who were almost destroyed by false allegations readily accepted by caseworkers doctors the media and too often the courts each of the six wrongly accused families profiled in this book faced an epic and life

changing battle when child protection caseworkers came to their homes to take their kids in each case a child had an injury whose cause was unknown it could have been due to an accident a medical condition or abuse each family ultimately exonerated itself and restored its family life but still bears scars from the experience that will never disappear the book tells why and how the child protection system failed these families it also examines the larger flaws in our country's child protection safety net that is supposed to sort out the innocent from the guilty in order to protect children

this book collects original essays by top scholars that address questions about the nature origins and effects of ambivalence while the nature of agency has received an enormous amount of attention relatively little has been written about ambivalence or how it relates to topics such as agency rationality justification knowledge autonomy self governance well being social cognition and various other topics ambivalence presents unique questions related to many major philosophical debates for example it relates to debates about virtues rationality and decision making agency or authenticity emotions and social or political metacognition it is also relevant to a variety of larger debates in philosophy and psychology including nature vs nurture objectivity vs subjectivity or nomothetic vs idiographic the essays in this book offer novel and wide ranging perspectives on this emerging philosophical topic they will be of interest to researchers and advanced students working in ethics epistemology philosophy of mind philosophy of psychology and social cognition
