master s thesis from the year 2015 in the subject business economics information management grade 13 university of applied sciences paderborn language english abstract the prevalence of information technology it and the significance of its role in modern companies have increased rapidly nowadays almost no business operations unit can work or function efficiently without the support of it based systems regardless of the general purpose of the respective company and the industry the company operates in after a given point a functioning it structure is a prerequisite for a fluent efficient and successful operation with an apparently almost infinite variety of it supported systems companies have to deal with the recurring question which parts of the company s it based systems possibly require a new implementation improvement or replacement after a decision regarding a new implementation an update improvement or a replacement has been made an overview must be developed of the tasks that will be needed to reach the project goal beyond a certain size and complexity these it systems cannot be changed on an ad hoc basis in such a case a detailed planning of the approach is an important factor to be coordinated to guarantee that the activities will be carried out on time within the budget and at the required level of quality these tasks are commonly defined within projects which are preferably coordinated by using project management process models however not every process model is equally appropriate for every project or project type to make a decision about which process model is to be used a wide range of aspects of the project have to be considered these aspects are not only project specific but also company related which means that not every project can be managed the same way in every company even if the project specific aspects are almost identical alongside the

project specific factors such as the given time frame the financial limitations and the commitment to quality other company specific factors have to be taken into consideration these include not only the amount of hr resources needed but also the skills of the available project members but the hr resources are not the only assets that have to be planned in addition to sufficient staffing the available software hardware and premises must be determined and often booked in advance

when the book was first published more than 20 years ago our intent was to write an introductory finance text that students could understand today the book has become the leading undergraduate finance text the book is intended for use in the introductory finance course the key chapters can be covered in a one term course or supplemented with cases and some outside readings used in a two term course pref

diploma thesis from the year 2008 in the subject business economics business management corporate governance grade 1 university of applied sciences language english abstract ours is a challenging age for business one of the reasons therefore is that the international customer increasingly demands efficiently integrated solutions for fairly complex problems these expectations are further intensified by the enormous cost pressure and global competition companies are facing nowadays by concentrating on the firm s core competences and by the continuously increasing international division of work these challenging expectations seem to be successfully addressed this is the reason why international project organisations and project teams have gained enormous importance over the last years moreover constantly innovated information and communication technology tools are contributing to a further facilitation of world wide collaboration the management of locally dispersed or international project teams however is increasingly challenged by a fairly diverse spectrum of barriers collectively they display an enormous amount of complexity consequently explaining the still considerably high failure rates of international project work on the basis of theoretical analysis as

well as an empirical investigation of selected international projects jointly conducted with project managers in practice the conclusion of this thesis suggests that projects are significantly troubled by barriers whose impact regularly is neglected more specifically these are barriers are related to peculiar issues such as culture communication and leadership this conclusion points out that by adequate consideration and acknowledgment of the enormous impact of these soft barriers international project work has better chances to reach the predefined goals this thesis will further provide useful suggestions and findings with regards to the management of international projects these findings derived from the observations made are meant to support companies and project managers in future in striving to successfully reach the desired outcomes of international projects
