a supply chain is a network of retailers distributors transporters storage facilities and suppliers that participate in the sale delivery and production of a particular product the concept of supply chain often involves backward integration acquiring ownership of one's supply chain in the hope of reducing supplier power and thus reducing input costs the four major functional components are demand planning manufacturing planning and scheduling supply planning transportation planning the reconfigured module 1 bscm exam covers the basics the exam attempts to test your basic understanding towards supply chain and the various pim production and inventory management concepts many people consider this exam as the easiest one to assure exam success you need to read and learn as much as possible our examfocus notes provides knowledge material to enhance your exam readiness we help answer those tough questions that cover advanced knowledge and concepts not commonly found in the standard study material still the coverage of the exam is huge expecting full and complete coverage of all the knowledge items from a single source is unrealistic you are therefore advised to use this book together with other study

resources for the best possible preparation

includes practice test questions secrets of the cpim detailed scheduling and planning exam helps you ace the certified in production and inventory management exam without weeks and months of endless studying our comprehensive secrets of the cpim detailed scheduling and planning exam study guide is written by our exam experts who painstakingly researched every topic and concept that you need to know to ace your test our original research reveals specific weaknesses that you can exploit to increase your exam score more than you've ever imagined secrets of the cpim detailed scheduling and planning exam includes the 5 secret keys to cpim exam success time is your greatest enemy guessing is not guesswork practice smarter not harder prepare don't procrastinate test yourself a comprehensive general strategy review including make predictions answer the question benchmark valid information avoid fact traps milk the question the trap of familiarity eliminate answers tough questions brainstorm read carefully face value prefixes hedge phrases switchback words new information time management contextual clues don't panic pace yourself answer selection check your work beware of directly quoted answers slang extreme statements answer choice families a comprehensive content review including finished goods anticipation inventory obsolete inventory ordering set up costs component parts semi finished goods optional replenishment system demand rate techniques period order quantity technique safety stock operating supplies statistical safety stock tracking signals assembly demand lumpy demand item master data file assembly stock quarantined stock master schedule horizon time bucket pegging system nervousness projected available balance priority planning bottom up re planning queue squeezing phantom bill of material cellular layout eighty twenty rule and much more

the cpim certification program has been reconfigured eco becomes the part 2 exam module 4 this product covers the eco module which emphasizes shop floor level operations controlling production activity on the shop floor is essential to a company's productivity better scheduling dispatching and tracking of work orders through the shop can improve that productivity dramatically

smr was the final module to take in the past now it becomes module 1 of the new part 2 exam is it tough well in a sense yes it is tough because there is no fixed answer to the test questions you are asked to choose the best possible answer among all potentially ok answers also most questions are long and

with complicated scenarios to confuse you to pick up the politically correct answers you have to use your business sense to make judgment on a case by case basis smr is all about supply side management at a higher global and strategic level what is serious supply management all about accenture has developed seven principles of supply chain management 1 segment customers based on their service needs 2 design the logistics network based on service requirements 3 listen to the signals of market demand and plan accordingly 4 differentiate products based on actual consumer demand 5 strategically manage the sources of supply 6 develop a supply chain wide technology strategy 7 adopt measures that apply to every link in the supply chain because of advances in manufacturing and distribution the cost of developing new products and services is dropping and time to market is speeding up this has resulted in increasing customer demands local and global competition and increased pressure on the supply chain to stay competitive companies must reinvent themselves so that the supply chain sourcing and procurement production scheduling order fulfillment inventory management and customer care is no longer a cost based back office exercise but rather a flexible operation designed to effectively address today s challenges if you have been specializing in manufacturing or shop floor functions it is now the time to move yourself to a managerial position you need to see things from a broader mba style perspective
