Originating in the United States following the stock market crash known as Black Tuesday, the economic downturn rapidly spread worldwide, affecting virtually every nation regardless of size or wealth. This period was marked by

unprecedented unemployment, deflation, banking failures, and a severe contraction of international trade. The interconnectedness of global economies meant that what started as a domestic crisis quickly became a global phenomenon. Countries with fragile economic structures, such as Germany, Britain, and Japan, experienced profound destabilization, leading to social unrest and political upheaval. Understanding this context is essential to grasp the importance of the reteaching activity, which aims to clarify the causes, effects, and responses to this historical event.

Key Causes and Contributing Factors The activity likely emphasizes several core causes of the depression: - **Over-speculation in the Stock Market:** The 1920s saw rampant speculative investments, creating an unsustainable bubble. - **Banking Crises:** Bank failures eroded public confidence and led to a contraction in credit. - **Overproduction and Underconsumption:** Industries and farms produced more than could be sold, leading to falling prices and layoffs. - **International Economic Policies:** Tariffs like the Smoot-Hawley Tariff exacerbated global trade tensions. - **Decline of the Gold Standard:** Limited monetary flexibility hindered economic recovery efforts. By analyzing these factors, students can better understand the complex web of causes that precipitated the depression and appreciate the interconnectedness of economic policies and global markets.
