designed to help educators collect and use data more effectively this guide enables the reader to develop three tools to use in decision making 1 a data notebook to capture the charts notes and agendas created during the process along with goals questions and process information 2 a master data directory for compiling the data sources that are available in the district and school and 3 the information based decision making roadmap that contains all the finished documents that have been used to make decisions in addition to developing a toolkit there is also a testing primer with basic standardized test information the primer can be used as a stand alone document and is specifically designed to assist the reader in using test data accurately when making decisions refining common sense will help educators develop a clear roadmap to answering questions about his her goals collect data to answer questions turn data into information use information in decision making written for teachers principals program directors superintendents board members and other educators the book also includes an accompanying cd with templates for all charts and blank charts in the appendix for copying

in this study i adopted a combined individual and sociocultural perspective on learning in order to investigate small group discussions in an inquiry based middle school science classroom the specific purpose of the study was to answer the following research questions a how can we classify students sense making statements b to what extent do students engage in sense making discussion smd and c which factors provide support for students smd to answer these questions two groups were videotaped during the interactions and motion unit from the constructing ideas in physical science middle school curriculum to classify students sense making statements i developed a six component framework for sense making discussion my six components of sense making discussion are predicting a phenomenon or experimental outcome clarifying the facts of a phenomenon or experimental result describing and explaining a phenomenon or experimental result defining describing clarifying and connecting scientific concepts procedures processes and representations testing knowledge compatibility and making a request for any of the above the extent of students sense making discussions was established by a documenting instances of student

sense making according to the six component scheme and then forming distributions of sense making instances and b calculating the percentage of time that groups dedicated to sense making discussion to determine the influence that various factors have on students sense making discussions i first drew on the research in collaboration discourse and nonverbal sense making to arrive at an initial list of personal group task and contextual factors that would likely influence the smd in this study i then picked out significant quantitative differences in sense making between groups students and different portions of the curriculum cycles sub sections etc and determined to what extent the initial list of factors contributed to the significant differences in smd and also to what extent any additional factors contributed to these differences my analysis showed that many of the factors from the initial list helped to explain the differences in sense making i also identified six other factors that contributed to these differences capacity for intra group guidance intellectual capacity time available for sense making external guidance awareness of the curriculum structure and an awareness and valuing of the curriculum goals
