Bureau of Entomology

national bestseller winner of the national book award in this groundbreaking biography t j stiles tells the dramatic story of cornelius commodore vanderbilt the combative man and american icon who through his genius and force of will did more than perhaps any other individual to create modern capitalism meticulously researched and elegantly written the first tycoon describes an improbable life from vanderbilt s humble birth during the presidency of george washington to his death as one of the richest men in american history in between we see how the commodore helped to launch the transportation revolution propel the gold rush reshape manhattan and invent the modern corporation epic in its scope and success the life of vanderbilt is also the story of the rise of america itself

now more than ever family medicine is alive and well in the united states the base of this medical specialty has traditionally been in the smaller cities suburban communities and rural areas of this country over the past decade however there has been a resurgence of interest in primary care in our major metropolitan areas as a solution to the high tech subspecialty pace of the tertiary care environment a rebirth of urban family medicine has accompanied these pioneering efforts to date the accomplishments are substantial and the prospects are bright there is still a long way to go and there are a significant number of hurdles to cross although diseases are generally the same wherever you are their effects as illness on the individual and the family are strongly influenced by the environment and social milieu urban families have distinctive and diverse problems cultural economic and ethnic training programs situated in the large cities must recognize these issues and include special emphasis on the situations that the family physician is likely to encounter during and after his training there is very little research literature on the background and nature of special urban problems and these areas are the subject of several chapters of this long overdue volume devoted specifically to urban family medicine dr birrer has persuaded true experts to share their knowledge with the reader

geotechnical engineering is now a fundamental component of construction projects the fourth and final volume of this book presents a range of retaining structures alongside soil reinforcement and improvement techniques and processes applied geotechnics for construction projects 4 first presents the concept of thrust fall then goes on to examine the behavior of retaining structures and their design and justification methods a variety of practical applications for retaining structures are then considered covering gravity walls sheet pile curtains in advance shoring excavations and retaining diaphragm walls the book goes on to study soil reinforcement and improvement techniques a subject that the author has dedicated thirty five years to researching and teaching from reinforced earth in situ soil nailing micropiles in situ soil compaction

stone columns and rigid inclusions to soil cement and lime cement columns this book ends with a comprehensive and practical discussion of the behavior of underground structures covering the concepts of convergence confinement stress evolution and subsidence estimation each chapter of this fourth volume is illustrated with concrete examples and measurements of retaining structures soil reinforcement and soil improvement from construction sites the result is a combination of geotechnical expertise and lessons learned from experience both of which are highly valuable in the field of applied geotechnics for construction projects

geotechnical engineering is now a fundamental component of construction projects the third volume of this book is its backbone dedicated to foundations for civil and industrial construction projects applied geotechnics for construction projects 3 first presents the basic theoretical principles and rules governing the designing and validation of foundations shallow semi deep and deep then presents real foundation projects with a detailed comparison of the approaches and methods of calculating foundations in relation to the reference systems and rules in force closely compared to and validated by the eurocodes the third chapter presents examples of foundation projects covering high side building rafts strip footings piles and embankments enriched by an unprecedented level of experience in the field of foundations for civil and industrial construction projects it ends with examples of damage to foundations and practical appendices each chapter of this third volume is illustrated with photographs and measurements of construction sites and is built on both theory and experience in the field of foundations as a whole the result is a combination of geotechnical expertise and lessons learned from experience both of which are highly valuable in the field of applied geotechnics for construction projects
