the compendium is an essential guidebook for selecting the right test for specific clinical situations and for helping clinicians make empirically supported test interpretations. It is revised and updated. It contains over 85 test reviews of well known neuropsychological tests and scales for adults. It includes tests of premorbid estimation, dementia screening, IQ, attention, executive functioning, memory, language, visuospatial skills, sensory function, motor skills, performance validity, and symptom validity. It covers basic and advanced aspects of neuropsychological assessment including psychometric principles, reliability, test validity, and performance validity testing.

Recently, technology and aging have been key research areas in human cognition. The research topic, digital skills and life-long learning, digital learning as a new insight of enhanced learning by the innovative approach joining technology and cognition, investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this research topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This research topic comprises review studies and original articles focused on digital skills that enhance human potential, transversal approaches, and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing in educational, rehabilitation, clinical settings across aging. Articles of high relevance to the research topic were submitted on the subjects of a research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.

The research topic of late-life psychopathology is about how various kinds of psychopathology manifest themselves in later life. The collection will include a broad spectrum of behavioral, cognitive, and emotional issues in older individuals, including mood disorders, anxiety disorders, psychotic disorders, sexual disorders, insomnia, and personality disorders, along with the psychopathological disorders in older adults. This research topic will be focused on the psychopathological similarities and differences across the various age groups.

This book has been replaced by *Assessment of Disorders in Childhood and Adolescence*, fifth edition, ISBN 978 1 4625 4363 2.

Homeless people with mental disorders and neuropsychiatric diseases are ubiquitous in space and time in mankind's history. Psychosis, personality disorders, drug abuse, and other brain illnesses represent a true challenge to medicine and society. Homeless people could be indeed brought to the attention of marontology, an unborn specialty of medicine already suggested after the Greek word *marontos*, which means unwanted homelessness. This is one of the most critically important issues of the contemporaneous world without a solution in sight. So more research in areas such as psychiatry, psychology, and human neuroscience is needed for a better

understanding of the phenomenon

in one volume the leading researchers in industrial organizational assessment interpret the range of issues related to industrial organizational tests including test development and psychometrics clinical applications ethical and legal concerns use with diverse populations computerization and the latest research clinicians and researchers who use these instruments will find this volume invaluable as it contains the most comprehensive and up to date information available on this important aspect of practice
