although studies have suggested that mindfulness based interventions might be effective in enhancing military readiness and resilience this has not been rigorously evaluated this report presents results from a systematic review and meta analyses of research examining how mindfulness meditation affects 13 performance related outcomes of interest to the u s army and broader military the authors supplemented the systematic review by examining how mindfulness meditation could support stress management and exploring characteristics of selected mindfulness programs the goal was to develop recommendations for mindfulness meditation programs for soldiers should the army choose to implement such programs in the future findings suggest that mindfulness may

improve some aspects of attention and emotion regulation impulsivity and work related morale and social support the available evidence does not suggest that mindfulness improves other outcomes of interest to the army notably mindfulness meditation programs reduce stress and may reduce parental stress which could benefit army families yet more research is needed to identify best practices for implementing mindfulness programs in the military the authors recommend conducting high quality evaluations of mindfulness meditation with soldiers and assessing the effect of mindfulness meditation on military families

a few clear factors are associated with living longer and healthier such as higher levels of physical activity good sleep patterns and proper nutrition however despite all the advances that have been made to increase the general population s physical activity improve their sleep patterns and boost their nutritional habits there is still a lot to be done this research topic aims to address the topic of healthy ageing and will consider manuscripts focused on the effects of improving these factors in all ages from childhood to old age we are mainly interested in questions of broader interventions at the individual home settings group school work and gerontology settings and societal level community based settings we also welcome papers investigating the short and long term effects of environmental factors on physical changes in children working and old age populations and their development correlational and survey studies examining the issues mentioned above are welcome
