great opportunity to unveil the mysteries of god what happens to our soul the second after our death i have seen many books written with that same theme but none of them was given a satisfactory answer on this intriguing question some books based on personal experiences others on superficial studies not giving the reader the final answer or the sense of having learned the solution to such a question this book was written based on the texts of the biblical scriptures where we study the original meaning of the hebrew word sheol and the greek word hades which were most of the time erroneously translated by hell or grave but actually meaning dwelling of the souls of the dead and in unraveling those meanings and comparing them with the context in which was originally written inspired by god one arrives at the conclusion and solution to several unanswered questions in the bible and fundamental to the understanding of the christian doctrine

and of its relationship with our lord and savior jesus christ the reader will discover a part never studied in the scriptures but unveiled because god made us known it s worthy of read and learn follow me in this discovery of the underworld the author wagner bariani santiago

joel m rothman considers the significance of cosmology in biblical and extra biblical texts and the role of the cosmic journey in many apocalyptic narratives he posits that revelation s narrative likewise takes the hearer on a virtual journey through a cosmic story space of great theological significance while scholarship commonly assumes a three tiered cosmos in revelation rothman argues that revelation s narrative operates in a four tiered cosmos with the hyper heaven sitting above the sky heaven earth and abyssal depths a cosmic story space that is recreated in the imagination of the hearers beginning with a methodology of visual narrative reading rothman then discusses the assumptions and existing conceptions regarding heaven and earth he stresses that revelation does not exhibit tension in its portrayal of heaven between heaven as a site of conflict and heaven as the realm in which god truly reigns but rather shows readers a sky heaven characterised by archetypal conflict between powerful sky beings and a hyper heaven defined by full recognition of the throne in journeying through the sky structure and god space and by analysing the four cosmic layers in operation the distinct nature of the two sky spaces cosmic change and the ideological import of the cosmic structure rothman demonstrates that the existence of the hyper heaven in contradistinction with the limited lived cosmos of earth and sky heaven is a present guarantee of the final cosmic transformation that creates a new space for human life exclusive of imperial draconian elements
