data methods and theory in the organizational sciences explores the long term evolution and changing relationships between data methods and theory in the organizational sciences in the last 50 years theory has come to dominate research and scholarship in these fields yet the emergence of big data as well as the increasing use of archival data sets and meta analytic methods to test empirical hypotheses has upset this order this volume examines the evolving relationship between data methods and theory and suggests new ways of thinking about the role of each in the development and presentation of research in organizations this volume utilizes the latest thinking from experts in a wide range of fields on the topics of data methods and theory and uses this knowledge to explore the ways in which behavior in organizations has been studied this volume also argues that the current focus on theory is both unhealthy for the field and unsustainable and it provides more successful ways theory can be used to support and structure research and demonstrates the most effective techniques for analyzing and making sense of data this is an essential resource for researchers professionals and educators who are looking to rethink their current approaches to research and who are interested in creating more useful and more interpretable research in the organizational sciences

discusses the history of geological sciences including geology seismology and the study of geomagnetism and profiles notable earth scientists throughout history

accessibly written by a team of international authors the encyclopedia of environmental change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change this three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field the encyclopedia includes all of the following aspects of environmental change diverse evidence of environmental change including climate change and changes on land and in the oceans underlying natural and anthropogenic causes and mechanisms wide ranging local regional
