human rights are invoked on many occasions but are they more than lofty values and abstract principles this text shows how human rights create legal entitlements for those protected by them and impose obligations on those bound by them

this textbook provides a thorough and systematic overview of human rights law including the most relevant practice and case law but also dealing with theoretical issues it pursues an original approach seeking to reconcile its didactic purpose with a scientific one positing that there must be a necessary synergy between these two purposes furthermore the author is convinced that international human rights law should not be studied as is done in virtually every textbook as a special legal regime separate and autonomous from the overall system of international law but as a regime that is fully integrated into the international legal order the book's dominant theme is the interrelationship of international human rights law and general international law following this approach the author has chosen to devote comparatively little content to institutional issues part iv and to instead more intensively explore the structural impact of human rights law on the entire international order part i on the sources part ii and obligations part iii of general international law and what constitutes fundamental human rights part v without neglecting other rights part vi

nearly all countries have ratified nearly all the major human rights treaties and all governments profess support for human rights yet most countries flagrantly violate the human rights of their citizens this

book argues that the reason why is that there is a contradiction between the goal of enforcing human rights which requires simple rules and the realities of governance which require flexibility and discretion

for over twenty five years the democratic republic of the congo has been depicted by the media as a nation in turmoil armed militias and armies ravage villages stealing crops and minerals while proxy wars displace countless citizens political violence corruption and social insecurity plague the nation leading to a humanitarian crisis where fundamental human rights are routinely violated this book delves into the harrowing realities of life in congo where public education and healthcare are in shambles and most people live on less than two dollars a day amidst this political leaders enjoy exorbitant salaries while public servants endure poverty this empirical research critically examines the gap between the constitutional provisions of human rights and their implementation presenting stark indicators of a failed state by analyzing the human rights situation from the universal declaration of human rights to the current state constitution the book reveals the congo's descent into chaos and calls for accountability for its violations

this handbook provides an intellectually rigorous and accessible overview of the relationship between natural law and human rights it fills a crucial gap in the literature with leading scholarship on the importance of natural law as a philosophical foundation for human rights and its significance for contemporary debates the themes covered include the role of natural law thought in the history of human rights human rights scepticism the different notions of subjective right the various foundations for human rights within natural law ethics the relationship between natural law and human rights in religious traditions the idea of human dignity the relation between human rights political community and law human rights interpretation and tensions between human rights law and natural law ethics this handbook is an ideal introduction to natural law perspectives on human rights while also offering a concise summary of scholarly developments in the field

this book instructively introduces the reader to the basics of jewish law it gives a detailed cutting edge analysis of contemporary public and private law in the state of israel as well as israel's legal culture its system of government and the roles of its democratic institutions the executive parliament and judiciary the book examines issues of holocaust law and religion constitutionalization and equality

the introduction of the human rights act has led to an explosion in books on human rights yet no sustained examination of their history and philosophy exists in the burgeoning literature at the same time while human rights have triumphed on the world stage as the ideology of postmodernity our age has witnessed more violations of human rights than any previous less enlightened one this book fills the historical and theoretical gap and explores the powerful promises and disturbing paradoxes of human rights divided in two parts and fourteen chapters the book offers first an alternative history of natural law in which natural rights represent the eternal human struggle to resist domination and oppression and to fight for a society in which people are no longer degraded or despised at the time of their birth in the 18th century and again in the popular uprisings of the last decade human rights became the dominant critique of the conservatism of law but the radical energy symbolic value and apparently endless expansive potential of rights has led to their adoption both by governments wishing to justify their policies on moral grounds and by individuals fighting for the public recognition of private desires and has undermined their ends part two examines the philosophical logic of rights rights the most liberal of institutions has been largely misunderstood by established political philosophy and jurisprudence as a result of their cognitive limitations and ethically impoverished views of the individual subject and of the social bond the liberal approaches of hobbes locke and kant are juxtaposed to the classical critiques of the concept of human rights by burke hegel and marx the philosophies of heidegger strauss arendt and sartre are used to deconstruct the concept of the legal subject semiotics and psychoanalysis help explore the catastrophic consequences of both universalists and cultural relativists when they become convinced about their correctness finally through a consideration of the ethics of otherness and with reference to recent human rights violations it is argued that the end of human rights is to judge law and politics from a position of moral transcendence this is a comprehensive historical and theoretical examination of the discourse and practice of human rights using examples from recent moral foreign policies in iraq rwanda and kosovo douzinas radically argues that the defensive and emancipatory role of human rights will come to an end if we do not reinvent their utopian ideal

the new israel peacemaking and liberalization argues that the ongoing israeli palestinian peace process will be expedited by increased economic liberalization israel has undergone dramatic economic change in the 1990s shifting from a strongly protectionist state centered economy to a more international neoliberal one the book maintains that these fundamental changes have in turn transformed israeli society as a whole resulting in a significant moderation of attitudes toward the palestinian people and palestinian nationalism the new israel contains contributions from both established israeli sociologists and promising young scholars the new israel peacemaking and liberalization is an insightful commentary on one of the most crucial international issues of our time
