dr montgomery is one of our leading christian apologists his writings have influenced several generations of apologists from around the globe his debates are legendary this book purports to break new ground apologetically as it assesses dr montgomery's work it focuses on his legal historical apologetic and in the process reframes it for both for the tough minded and the tender hearted it shows not only the rationality of montgomery's work but also that his writings pave the way for an apologetic to new age followers and to those

who place experience before reason a special feature of this analysis concerns montgomery s apologetic insights on the occult and paganism this book also breaks new ground as the legal apologetic model has not been previously assessed it illustrates that a juridical apologetic style has a rich history dating back to the gospels themselves the present work should thus be of particular interest to apologists theologians philosophers of religion pastors and all who are concerned to share the legal historical fact of the resurrection of jesus together with its relevance in a secular age

contrary to conventional narratives about legal education aspiration and reality in legal education reveals a widespread desire among law teachers to integrate both theory and practice into the education of versatile and civic minded lawyers despite this stated desire however this aspiration is largely unrealized due to a host of intellectual and institutional factors that produce a profound gap between what professors believe about law and the ideas they communicate through their teaching drawing on interviews with over sixty law professors in canada david sandomierski makes two important empirical discoveries in this book first he establishes that contrary to a dominant narrative in legal education that conceives of theory and practice as oppositional the vast majority of law professors consider theory to be vitally important in preparing better lawyers second he uncovers a significant gap between the realist theoretical commitments held by a majority of professors and the formalist theories they almost uniformly convey through their teaching and conceptions of legal reasoning understanding the intellectual and institutional factors that account for these tensions sandomierski argues is essential for any meaningful project of legal education reform
