my interest in nonverbal behavior has remained constant for over 15 years i think this has been the case because nonverbal behavior has proved a very fascinating and challenging topic others might suggest that i am just a slow learner with enough time in any area however one begins to feel that he or she has some special insights to offer to others about the time that i was struck with that thought approximately two and a half years ago i was developing the first version of my sequential functional model of nonverbal exchange it seemed to me that the functional model might provide a very useful framework for a book discussing and analyzing nonverbal behavior i did not want nor do i think i had the patience to write a comprehensive review of research on nonverbal behavior other works such as siegman and feldstein s 1978 edited nonverbal behavior and communication and harper wiens and matarazzo s 1978 nonverbal communication the state of the art have provided excellent reviews of the research on nonverbal behavior instead what i have tried to do in this book is to use nonverbal behavior as a vehicle for discussing social behavior in a very real sense this analysis of nonverbal behavior is a means to an end not an end in itself a consequence of this approach is that this review is a selective one unlike the comprehensive works mentioned earlier
