based on years of teaching psychiatry to medical students and residents this single authored textbook offers a conversational yet detailed guide to modern psychiatric theory and practice exploring various approaches to psychiatric disorders including neurobiology dimensional personality assessment behavioral science and psychodynamic and cognitive theories it lucidly illustrates each approach s strengths and weaknesses and

suggests how clinicians can interweave them in working with patients using clinical vignettes and recent research findings to illustrate the connections between phenomenology pathophysiology and treatment it covers all of the major psychiatric disorders and includes tables listing their dsm iv tr diagnostic criteria the book offers balanced coverage of subjects that receive scant attention in other introductory textbooks including the limitations of the dsm iv categorical approach to psychiatric diagnosis controversies surrounding the dissociative disorders and recovered memories and the prescription of stimulant medications to children with suspected attention deficit hyperactivity disorder later chapters provide practical guidelines for estimating a patient's risk of suicide and violence and for assessing competence to consent to medical or psychiatric treatment in eschewing a dry recitation of clinical syndromes for an engaging discussion aimed at teaching the reader how to think psychiatrically the book will appeal to medical students psychiatric residents mental health clinicians and primary care physicians

since the second edition of this book 1977 model theory has changed radically and is now concerned with fields such as classification or stability theory nonstandard analysis model theoretic algebra recursive model theory abstract model theory and model theories for a host of nonfirst order logics model theoretic methods have also had a major impact on set theory recursion theory and proof theory this new edition has been updated to take account of these changes while preserving its usefulness as a first textbook in model theory whole new sections have been added as well as new exercises and references a number of updates improvements and corrections have been made to the main text

rediscovering grounded theory is a bold re evaluation of the origins of grounded theory a philosophical clarification of its key ideas and a presentation of the most effective way to use its techniques in your research it answers questions such as what should grounded theory look like how do i recognise grounded theory and how do i produce good grounded theory by returning to the original ideas as they were presented by glaser and Strauss sharp clear and thought provoking the book includes detailed analysis of the current literature exemplar sections filled with detailed real world examples and applications a detailed glossary it will provide you with a grasp of what a grounded theory should look like take you through the process of building a grounded theory and then explain best practice for critically evaluating the quality of grounded theory research

are social scientific theories and confessional theologies of sacrifice equally well suited as public discourse about religion the french liberal protestant theologians of the 5th section of the École pratique and the french doyen of sociology Émile Durkheim and his two main followers Henri Hubert and Marcel Mauss engage in a struggle over the proper approach to sacrifice in the public university the Durkheimians argued that theological language and assumptions were inappropriate for this purpose because of their confessional allegiances another approach to sacrifice free of confessional entanglements was required this is what Hubert and Mauss sought to provide in the sacrifice its nature and function

a primer of signal detection theory is being reprinted to fill the gap in literature on signal detection theory a theory that is still important in psychology hearing vision audiology and related subjects this book is intended to present the methods of signal detection theory to a person with a basic mathematical background it assumes knowledge only of elementary algebra and elementary statistics symbols and terminology are kept at a basic level so that the eventual and hoped for transfer to a more advanced text will be accomplished as easily as possible intended for undergraduate students at an introductory level the book is divided into two sections the first part introduces the basic ideas of detection theory and its fundamental measures its aim is to enable the reader to be able to understand and compute these measures it concludes with a detailed analysis of a typical experiment and a discussion of some of the problems which can arise for the potential user of detection theory the second section considers three more advanced topics threshold theory the extension of detection theory and an examination of thurstonian scaling procedures

seminar paper from the year 2014 in the subject politics topic peace and conflict security grade 1 3 university of bamberg language english abstract the united nations un in international relations is considered to be a supranational organization currently the un consist of 193 member states and it stresses out four main purposes which are maintaining peace and security developing friendly relations amongst states helping states to work together and being a centre for harmonizing the actions of nations cf un org en aboutun additionally the un is seen as a collective security system which offers states to settle down any disputes and for solving social economic humanitarian and ecological problems on international level cf gareis varwick 2006 85 according to this purposes the un has acted and authorized multilateral interventions in many states which were affected by conflicts the libyan conflict in 2011 as an example was one of the cases where the un has responded to the actions and the multilateral intervention in libya leaves questions how does the un shape the behavior of its member states and why does the un act in general the theory of social constructivism by alexander wendt can provide an explanation to these questions the theory defines balances of power between states and explains the behavior of states furthermore it claims that international relations are social and the international system is constituted by ideas cf jackson sorensen 2006 162 but the main question which shall be discussed in this term paper is therefore how can the theory of social constructivism explain the actions by the united nations security council in libya first of all core assumptions of social constructivism has to be discussed in order to explain further analysis of this term paper after the illustration of the core assumptions of social constructivism the powers and functions of the un security council shall be described because the security council as one of the most important main body of the un is the only executive body that act regarding any threat of peace and security thereafter the situation in libya as the empirical example have to be mentioned what exactly happened in libya and what did the un especially the security council do altogether with the core assumptions of social constructivism the theoretical knowledge of the security council and the information of the libyan conflict the main question shall be answered at the end the conclusion shall summarize the term paper s outcome of the

analysis
