this volume was first published by inter disciplinary press in 2014 unsettling whiteness brings together an international collection that considers anew the politics practices and representations of whiteness at a time when nations worldwide continue to grapple with issues that are underwritten by whiteness

this special issue reviews state of the art approaches to the biophysical roots of cognition these approaches appeal to the notion that cognitive capacities serve to optimize responses to changing external conditions crucially this optimisation rests on the ability to predict changes in the environment thus allowing organisms to respond pre emptively to changes before their onset the biophysical mechanisms that underwrite these cognitive capacities

remain largely unknown although a number of hypotheses has been advanced in systems neuroscience biophysics and other disciplines these hypotheses converge on the intersection of thermodynamic and information theoretic formulations of self organization in the brain the latter perspective emerged when shannon s theory of message transmission in communication systems was used to characterise message passing between neurons in its subsequent incarnations the information theory approach has been integrated into computational neuroscience and the bayesian brain framework the thermodynamic formulation rests on a view of the brain as an aggregation of stochastic microprocessors neurons with subsequent appeal to the constructs of statistical mechanics and thermodynamics in particular the use of ensemble dynamics to elucidate the relationship between micro scale parameters and those of the macro scale aggregation the brain in general the thermodynamic approach treats the brain as a dissipative system and seeks to represent the development and functioning of cognitive mechanisms as collective capacities that emerge in the course of self organization its explicanda include energy efficiency enabling progressively more complex cognitive operations such as long term prediction and anticipatory planning a cardinal example of the bayesian brain approach is the free energy principle that explains self organizing dynamics in the brain in terms of its predictive capabilities and selective sampling of sensory inputs that optimise variational free energy as a proxy for bayesian model evidence an example of thermodynamically grounded proposals in this issue associates self organization with phase transitions in neuronal state spaces resulting in the formation of bounded neuronal assemblies neuronal packets this special issue seeks a discourse between thermodynamic and informational formulations of the self organising and self evidencing brain for example could minimization of thermodynamic free energy during the formation of neuronal packets underlie minimization of variational free energy

build a pc that will outperform any brand name box on the market yes even if you re not a total geek you can build your own pc and we guarantee it s worth the effort you ll discover that the quality is better and the cost is much lower than any comparable off the shelf pc you can buy design the custom computer you want and have fun doing it get high quality pc hardware from local stores and online vendors plan your computer project with a complete checklist create the ideal pc that will run windows 7 or linux take advantage of the latest multi core cpus assemble test and configure your pc with ease build a pc that meets your needs and fits your budget written by hardware

experts this book delivers complete instructions for building your own dream machine with high quality components whether it s a pc for general use extreme gaming a media center or home server straightforward language clear directions and easy to follow illustrations make this guide a breeze for computer builders of any skill level even those with no experience building the perfect pc presents six in depth custom pc projects mainstream pc fast flexible quiet and reliable at a reasonable price extreme system a wicked fast pc for video editing gaming and more media center one pc to replace your tivo game console dvd and cd player home server ideal home network hub to store share and secure data appliance pc a tiny quiet inexpensive pc you can put anywhere budget system reliable and highly functional at a low low price

maximum pc is the magazine that every computer fanatic pc gamer or content creator must read each and every issue is packed with punishing product reviews insightful and innovative how to stories and the illuminating technical articles that enthusiasts crave

caged beauty how society shapes love power and choice love is often seen as a personal choice yet it is shaped by powerful unseen forces youth beauty wealth status and housing quietly decide who gets chosen who waits and who is left behind caged beauty blends real life stories with cultural and economic insight to reveal the hidden rules of modern relationships from istanbul s gated communities to rooftop hotel bars from family arranged marriages to the high speed romances of global cities it uncovers how money housing and class silently rewrite the rules of attraction inside readers will discover why wealthy men and beautiful women so often find each other and why it rarely lasts how family expectations can outweigh even the strongest love why housing and economic stability are among the most underestimated dating factors how beauty can be both a gift and a cage why marriage often depends more on timing than compatibility the most overlooked dating advice for young men move out of the family home as soon as possible and if that is not yet possible start saving for a down payment and press local government to relax zoning laws these are not theories every chapter is drawn from real people real lives and real consequences showing how desire dignity and survival are entangled in the modern world for anyone seeking to understand relationships as they truly are beyond hollywood myths influencer fantasies or recycled self help slogans this is the guide
