this monograph presents new ideas in nomic truth approximation it features original and revised papers from a formal philosopher of science who has studied the concept for more than 35 years over the course of time the author s initial ideas evolved he discovered a way to generalize his first theory of nomic truth approximation viz by dropping an unnecessarily strong assumption in particular he first believed to have to assume that theories were maximally specific in the sense that they did not only exclude certain conceptual possibilities but also that all non excluded possibilities were in fact claimed to be nomically possible now he argues that the exclusion

claim alone or for that matter the inclusion claim alone is sufficient to motivate the formal definition of being closer to the nomic truth the papers collected here detail this generalized view of nomic truthlikeness or verisimilitude besides this the book presents in adapted form the relation with several other topics such as domain revision aesthetic progress abduction inference to the best explanation pragmatic aspects probabilistic methods belief revision and epistemological positions notably constructive realism overall the volume presents profound insight into nomic truth approximation this idea seeks to determine how one theory can be closer to or more similar to the truth about what is nomically e g physically chemically biologically possible than another theory as a result it represents the ultimate goal of theory oriented empirical science theo kuipers is the author of studies in inductive probability and rational expectation 1978 from instrumentalism to constructive realism 2000 and structures in science 2001 he is the volume editor of the handbook on general philosophy of science 2007 in 2005 there appeared two volumes of essays in debate with theo kuipers entitled confirmation empirical progress and truth approximation and cognitive structures in scientific inquiry

the subtitle philosophical considerations was published by archway in 2024 the project now turns to theological considerations with the forthcoming volume three being ecclesiological consideration organized into three parts volume two focuses on the theological endeavor and the doctrines distinctive to christianity namely the trinity jesus christ sin and salvation based on the foundational distinctions and definitions explicated in volume one the current volume seeks to ask what the philosophical considerations imply for basic traditional understandings and terminology of christian theology including that of jesus of nazareth his crucifixion and resurrection the project as a whole adopts a trinitarian structure with this second volume focused on god the son or as here termed god the perfecter the argument is that christian theology needs to shift from an anthropocentric to a theocentric approach recognizing human beings simply as creatures and having the courage to face what that entails yet doing so necessitates a radical reconceptualization of the very foundations of christian theology itself in the attempt to combat idolatry
