this first edition focuses on probability and the bayesian viewpoint it presents basic material on probability and then introduces inference by means of bayes rule the

emphasis is on statistical thinking and how one learns from data the objective is to present the basic tenets of statistical inference unique in its format the text allows students to discover statistical concepts explore statistical principles and apply statistical techniques in addition to the numerous activities and exercises around which the text is built the book includes a basic text exposition for each topic and data appendices

shorn of all subtlety and led naked out of the protective fold of educational research literature there comes a sheepish little fact lectures don't work nearly as well as many of us would like to think george cobb 1992 this book contains activities that guide students to discover statistical concepts explore statistical principles and apply statistical techniques students work toward these goals through the analysis of genuine data and through interaction with one another with their instructor and with technology providing a one semester introduction to fundamental ideas of statistics for college and advanced high school students workshop statistics is designed for courses that employ an interactive learning environment by replacing lectures with hands on activities the text contains enough expository material to stand alone but it can also be used to supplement a more traditional textbook some distinguishing features of workshop statistics are its emphases on active learning conceptual understanding genuine data and the use of technology the following sections of this preface elaborate on each of these aspects and also describe the unusual organizational structure of this text

this manual of activities is written for support staff oco the unsung heroes and heroines of organizations who often are the ones for whom there is no training budget or who can not be spared from their work to spend time in training the book presents a wide range of activities and handouts to help teach and apply the most critical competences for administrative secretarial and support professionals titles include delivering bad news getting my point across proud to be part of the team and getting organized itocos all here oc the activity description target group objectives number of participants time materials important notes for the trainer method and optional elements included is an activity time checklist oco so you can choose from exercises that can be completed in 60 minutes 60 90 minutes and two hours the 50 activities are conveniently organized into 10 areas orientation motivation and empowerment caring for our customers face to face communication telephone skills written communication time management managing small projects meetings presentation skills this training can be carried out in short sessions and in house by supervisors or managers who are not officially trainers the exercises all actively involve the participants and oco because they are fun oco have much more impact with 50 training activities for administrative secretarial and support staff you can motivate your staff encourage them to achieve the best possible standards and enable them to grow in their constantly evolving jobs

this book has a primary focus on inclusions for solutions to problems and not just more on the nature of the current and emerging problems that most other competing titles present the book is also a true global representation of challenges and opportunities that have been encountered addressed and critiqued from a wide variety of contributors rather than academicians per se in doing so rather than focusing on technocentric prowess and associated case studies of the west as is the case in most competing titles the book also equally emphasizes upon the vulnerabilities and mitigating solutions being developed and tested in the under developed and developing nations besides this the book also acquires an equity oriented focus and hints upon sustainable inclusive modes of shaping our built environment throughout the contributing chapters the book is also unique in the way it combines the chosen themes to provide a holistic coverage of the broader determinants of urban health and wellbeing thus being better positioned to address sdg3 within one compact volume the book also differs from a typical conference proceeding or a non peer reviewed book since the book's highly theme specific approach is curated by a scientific peer review committee to carefully maintain diversity of contributions to the book cities have a profound power to support or hinder human health and wellbeing in countless ways achieving greater health equity has emerged in recent years as a key priority and consideration when designing cities to promote health and wellbeing although there is a dearth of evidence and practical examples of research translation to guide cities and communities the book accordingly exemplifies a pluralistic approach to achieving urban health equity which recognises and addresses critical aspects of geography age race background socioeconomic status disability gender etc with interdisciplinary science clearly pointing to the role of the neighbourhood environment as one of the most important health determinants this book will undoubtedly lead the next generation of urban health actors to build contextually responsive equitable empathic cities to benefit residents around the world the book rather than being focused purely on academic propositions for building equitable cities offers a unique multi stakeholder perspective by collaborating with the international society for urban health's 18th international conference on urban health this unique collaboration allows access to hundreds of scientists architects urbanists multilaterals policymakers non profit leaders and grassroots organizers the book captures the voices and concerns of such diverse cross sectoral professionals and showcases findings that turn evidence into action and impact in communities around the world chapter 14 is available open access under a creative commons attribution 4.0 international license via [link.springer.com](http://link.springer.com)

this book draws upon vygotsky's idea of perezhivanie emotions and imagination and introduces the concepts of subjective sense and subjective configuration these concepts are crucial for explaining and understanding children's development from a cultural historical perspective a book which theorises the relations between the social and the individual through a study of a child's perezhivanie which analyses emotions

more holistically and advances the concepts of subjective sense and subjective configuration is much needed this book examines the complexity of human development through a comprehensive elaboration of these concepts allowing for new insights to be put forward it doesn't always follow the chronological order of vygotsky's publications as many of his works remained in the family archives until the 1980s when his selected works were first published in russian there has long been a need for a contemporary book on the scholarly treatment of perezhevanie emotions and subjectivity and as such this book revisits dominant representations of these concepts and then puts forward new ways of conceptualising and using them in empirical research the chapters cover a broad range of case studies where the concepts of perezhivanie emotions and imagination and subjective sense and subjective configuration are used to give new empirical and theoretical insights into the study of human development
