design your practice to meet the needs of geriatric patients office staff and yourself special features older patients require specific design and practice management considerations incorporated into the medical practice to improve patient care the american medical association ama has produced geriatric care by design to highlight the unique needs of aging patients in a physician practice through a design practice management perspective this resource presents strategies that help you successfully manage opportunities and challenges such as accessibility issues coordination of care supportive office systems case studies and lessons learned from experts in the fields of both primary and specialty care provide information and clear insight on how to design an environment that meets the needs of physicians patients and office staff more features available in both print format and e book formats this publication features easy to implement ideas pragmatic plans and templates that are readily available at your fingertips for making changes both big and small in your practice it is formatted to fit the lives of busy practitioners through bulleted points and easy to use checklists tables and links to resources for additional information topics covered include structural design evaluating your practice staffing and human resources role for the family caregiver health literacy and patient self management culturally effective care and health disparities medical home coordination of care

this book creates a value proposition in geriatric care a promise of value to be delivered to improve care and to provide specific benefits to healthcare systems it describes strategies and understanding of the incentives barriers encountered in promoting changes in the healthcare systems and discusses numerous examples and outcomes drawn from many fields such as medicine and science sociology politics business and economics the book helps guide the introduction of geriatric principles into mainstream medical care with the goal of improving the care and quality of life of older persons in all healthcare systems

as the first of the nation's 78 million baby boomers begin reaching age 65 in 2011 they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs retooling for an aging america calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other

informal caregivers who currently receive little or no training in how to tend to their aging loved ones the book also recommends that medicare medicaid and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides educators and health professional groups can use retooling for an aging america to institute or increase formal education and training in geriatrics consumer groups can use the book to advocate for improving the care for older adults health care professional and occupational groups can use it to improve the quality of health care jobs

design your practice to meet the needs of geriatric patients office staff and yourself special features older patients require specific design and practice management considerations incorporated into the medical practice to improve patient care the american medical association ama has produced geriatric care by design to highlight the unique needs of aging patients in a physician practice through a design practice management perspective this resource presents strategies that help you successfully manage opportunities and challenges such as accessibility issues coordination of care supportive office systems case studies and lessons learned from experts in the fields of both primary and specialty care provide information and clear insight on how to design an environment that meets the needs of physicians patients and office staff more features available in both print format and e book formats this publication features easy to implement ideas pragmatic plans and templates that are readily available at your fingertips for making changes both big and small in your practice it is formatted to fit the lives of busy practitioners through bulleted points and easy to use checklists tables and links to resources for additional information topics covered include structural design evaluating your practice staffing and human resources role for the family caregiver health literacy and patient self management culturally effective care and health disparities medical home coordination of care

reichel s formative text is designed as a practical guide for health specialists confronted with the unique problems of geriatric patients

as the baby boomers age concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging this is especially true with the population deemed to be the oldest of the old specifically those over the age of 85 unlike any other time in history this demographic is the fastest growing segment of most developed countries in the united states the oldest old is projected to double from 4.3 million to 9.6 million by 2030 the increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions diet public health and advancement in medical care with this we have seen a steady decline in the age specific prevalence of vascular and heart diseases stroke and even dementia older persons are healthier today than their counterparts decades ago more importantly than in any other age group the care of the oldest old must be individualized management decisions should be made taking into consideration the older persons expressed wishes quality of life function and mental capacity the inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases multiple co existing pathologies and neuro degenerative diseases the oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old furthermore among the oldest old physiologically they are more diverse than

other segments of the population their demographic characteristics are unparalleled and different compared to that of the younger old several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old as a result the use of age as a criteria in determining the appropriateness of treatment is of very limited validity yet there are limited resources that guide physicians through these challenges this book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic this book is designed for geriatricians primary care physicians junior medical officers specialty geriatrics nurses and gerontologists it is divided into 3 sections general considerations chronic diseases and geriatric syndromes each chapter provides a summary of important and essential information under the heading of key points case studies are included in some of the chapters to highlight the principles of management

praise for the third edition the third edition of this outstanding resource reflects the many advances in the care of older people that have occurred since the publication of the second edition the vast bulk of the content is accessible and relevant to an international audience the indexing and cross referencing are excellent score 5 5 stars margaret arthur nursing standard the information in this book is amazing i reviewed topics in which i have expertise and was very satisfied this is an excellent addition to my library and i will refer to it often much like a medical dictionary score 90 4 stars doody s medical reviews provides 273 comprehensive yet succinct entries on a variety of topics related to elder care in addition many of the entries include see also references that help readers easily navigate the book recommended choice current reviews for academic libraries this expanded one of a kind reference of more than 250 entries provides a comprehensive guide to all of the essential elements of elder care across a breadth of health and social service disciplines responding to the needs of providers directcare workers family and other caregivers the diverse array of entries included in this encyclopedia recognize and address the complex medical social and psychological problems associated with geriatric care in addition to a brief accessible summary of each topic entries include several key references including web links and mobile apps for additional sources of information this updated edition contains more than 30 new entries written by renowned experts that address a variety of elder care topics new to the fourth edition new entries addressing ethics consultation eye disorders pain acute and chronic and many others key features provides succinct descriptions of over 250 key topics for health and social service clinicians offers crucial information for elder care providers across all settings and disciplines distills current evidence based literature sources written by nationally recognized expert researchers and clinicians includes links to useful websites and mobile apps

this book distills the wealth of knowledge contained in the classic text geriatric medicine an evidence based approach 4 e into a practical guide for primary care family medicine and internal medicine residents written by top experts in the field the book offers a detailed compact overview of geriatric care it addresses geriatric pharmacology medicare and medicaid and numerous other subjects unique to older adults the case based instructional approach helps readers navigate the complexity of prevention presentation and treatment for conditions such as depression dementia and hypertension

graphs and tables aid the reader in determining the proper courses of treatment

there is both a timeliness and a transcendent rightness in the fact that scholars clinicians and health professionals are beginning to examine the ethics based components of decision making in health care of the elderly ethics as the discipline concerned with right or wrong conduct and moral duty pervades hospital rooms nursing home corridors physicians offices and the halls of congress as decisions are made that concern the allocation of health related services to individuals and groups in need in particular care of older persons recently has received disproportionate attention in discussions of ethics and clinical care age alone of course should not generate special focus on ill individuals about whom concerns arise based on value conflicts tacitly involved in the delivery of health care having said that age is not the principal criterion for attention to ethics based concerns in health care it must be acknowledged that old people have a high prevalence of conditions that provoke interest and put them in harm's way if value conflicts are not identified and seriously addressed issues that concern autonomy the allocation of scarce resources inter generational competition and conflict the withholding of treatment in treatable disease and substitute and proxy decision making for the cognitively impaired all have special relevance for older persons
