people all over the world make art and take pleasure in it and they have done so for millennia but acknowledging that art is a universal part of human experience leads us to some big questions why does it exist why do we enjoy it and how do the world's different art traditions relate to art and to each other art without borders is an extraordinary exploration of those questions a profound and personal meditation on the human hunger for art and a dazzling synthesis of the whole range of inquiry into its significance esteemed thinker ben ami scharfstein's encyclopedic erudition is here brought to bear on the full breadth of the world of art he draws on neuroscience and psychology to understand the way we

both perceive and conceive of art including its resistance to verbal exposition through examples of work by Indian Chinese European African and Australian artists art without borders probes the distinction between accepting a tradition and defying it through innovation which leads to a consideration of the notion of artistic genius continuing in this comparative vein Scharfstein examines the mutual influence of European and non European artists then through a comprehensive evaluation of the world's major art cultures he shows how all of these individual traditions are gradually but haltingly conjoining into a single current of universal art finally he concludes by looking at the ways empathy and intuition can allow members of one culture to appreciate the art of another lucid learned and incomparably rich in thought and detail art without borders is a monumental accomplishment on par with the artistic achievements Scharfstein writes about so lovingly in its pages

catalogue for quincentenary exhibition examining the art and history of the principal cultures in Europe and the Mediterranean Eastern Asia and the Americas

This book examines puzzles about the arts wherever their provenance as long as there is empirical research using the methods of social science interviews experimentation data collection statistical analysis that can shed light on these questions the examined research reveals how ordinary people think about these questions and why they think the way they do an inquiry referred to as intuitive aesthetics the book shows how psychological research on the arts has shed light on and often offered surprising answers to such questions

Art historians have long been accustomed to thinking about art and artists in terms of national traditions this volume takes a different approach suggesting instead that a history of art based on national divisions often obscures the processes of cultural appropriation and global exchange that shaped the visual arts of Europe in fundamental ways between 1492 and the early twentieth century essays here analyze distinct zones of contact between various European states between Asia and Europe or between Europe and so called primitive cultures in Africa the Americas and the South Pacific focusing mainly but not exclusively on painting drawing or the decorative arts each case foregrounds the centrality of international borrowings or colonial appropriations and counters conceptions of European art as a pure tradition uninfluenced by the artistic forms of other cultures the contributors analyze the social cultural commercial and political conditions of cultural contact including tourism colonialism religious pilgrimage trade missions and scientific voyages that enabled these exchanges well before the modern age of globalization contributors Claire Farago University of Colorado at Boulder Elisabeth A. philosophers have discussed art or artistic practices such as poetry since ancient times but systems of art and entertainment appeared only in the modern era in the west during the 18th and 19th centuries and philosophers have largely neglected the concept of entertainment in this book andy hamilton explores art and entertainment from a philosophical standpoint he argues against modernist theory that art and entertainment are not opposites but form a loosely connected conceptual system against postmodernism however he insists on their vital differences hamilton begins by questioning the received modernist view examining artist entertainers including jane austen charles dickens louis armstrong and billie holiday entertainment he argues is by nature audience centred but so is art in a different way thus while art should pass the test of time entertainment must pass the test of its own time it has to entertain at the time it is produced art and entertainment are inter dependent concepts and must be understood together with other aesthetic concepts including criticism genius canons and design these

concepts form the subject of later chapters of this book where hamilton develops a meritocratic position that is neither elitist nor populist he also addresses the contemporary charge of cultural appropriation and qualifies it an innovative feature of the book is the inclusion of dialogues with artists critics and academics that help to recast or reformulate the debate art and entertainment a philosophical exploration is essential reading for those working in art and aesthetics and will also be of interest to those in related disciplines such as cultural studies music and film studies with an interest in entertainment
