this text of applied chemistry considers the interface between chemistry and chemical engineering using examples of some of the important process in dustries integrated with this is detailed consideration of measures which may be taken for avoidance or control of potential emissions this new emphasis in applied chemistry has been developed through eight years of experience gained from working in industry in research development and environment al control fields plus twelve years of teaching here using this approach it is aimed primarily towards science and engineering students as well as to envi ronmentalists and practising professionals with responsibilities or an interest in this interface by providing the appropriate process information back to back with emis sions and control data the potential for process fine tuning is improved for both raw material efficiency and emission control objectives this approach also emphasizes integral process changes rather than add on units for emis sion control add on units have their place when rapid action on an urgent emission problem is required or when control simply is not feasible by pro cess integral changes alone obviously fundamental process changes for

emission containment are best conceived at the design stage however at whatever stage process modifications are installed this approach to control should appeal to the industrialist in particular in that something more substantial than decreased emissions may be gained

this book examines the valuation of internet enabled businesses across their industry life cycles demonstrating the shifts in valuation multiples and drivers over time providing a comprehensive framework to better understand and optimize business valuations internet evolution as natural experiment the internet's rise from innovation to necessity driven by 5g and ai offers a unique lens on valuation methodologies across industry life cycles methodological approach unprecedented quantitative and qualitative research analyzing 1 767 companies globally across 21 industries and 15 years covering 120 multiples 216 drivers and 100 million data points valuation framework it proposes a groundbreaking framework linking valuation multiples and drivers to industry life cycles illustrating the shift from revenue to profitability based multiples and from growth centric to growth and profitability drivers as companies mature practical implications it concludes with recommendations for stakeholders on monitoring valuation multiples and drivers for value maximizing strategies across virtually all mature and emerging technologies

whisky technology production and marketing explains in technical terms the science and technology of producing whisky combined with information from industry experts on successfully marketing the product world experts in scotch whisky provide detailed insight into whisky production from the processing of raw materials to the fermentation distillation maturation blending production of co products and quality testing as well as important information on the methodology used for packaging and marketing whisky in the twenty first century no other book covers the entire whisky process from raw material to delivery to market in such a comprehensive manner and with such a high level of technical detail only available work to cover the entire whisky process from raw material to delivery to the market in such a comprehensive manner includes a chapter on marketing and selling whisky foreword written by alan rutherford former chairman and managing director of united malt and grain distillers ltd

the globally important nature of wetland ecosystems has led to their increased protection and restoration as well as their use in engineered systems underpinning the beneficial functions of wetlands are a unique suite of physical chemical and biological processes that regulate elemental cycling in soils and the water column this book provides an in depth coverage of these wetland biogeochemical processes related to the cycling of macroelements including carbon nitrogen phosphorus and sulfur secondary and trace elements and toxic organic compounds in this synthesis the authors combine more than 100 years of experience studying wetlands and biogeochemistry to

look inside the black box of elemental transformations in wetland ecosystems this new edition is updated throughout to include more topics and provide an integrated view of the coupled nature of biogeochemical cycles in wetland systems the influence of the elemental cycles is discussed at a range of scales in the context of environmental change including climate sea level rise and water quality frequent examples of key methods and major case studies are also included to help the reader extend the basic theories for application in their own system some of the major topics discussed are flooded soil and sediment characteristics aerobic anaerobic interfaces redox chemistry in flooded soil and sediment systems anaerobic microbial metabolism plant adaptations to reducing conditions regulators of organic matter decomposition and accretion major nutrient sources and sinks greenhouse gas production and emission elemental flux processes remediation of contaminated soils and sediments coupled c n p s processes consequences of environmental change in wetlands the book provides the foundation for a basic understanding of key biogeochemical processes and its applications to solve real world problems it is detailed but also assists the reader with box inserts artfully designed diagrams and summary tables all supported by numerous current references this book is an excellent resource for senior undergraduates and graduate students studying ecosystem biogeochemistry with a focus in wetlands and aquatic systems

includes abstracts of magazine articles and book reviews

When somebody should go to the books stores, search instigation by shop, shelf by shelf, it is truly problematic. This is why we present the books compilations in this website.
