this paper reviews the history progress of understanding development theory over the past 50 years development thinking has evolved from an early paradigm that focused on savings capital investment to subsequent arguments favoring the inclusion of human capital policy technical change finally to the inclusion of the role of institutions good governance secure property rights in the broadest sense which are applicable to all resources not just land are particularly important to realize investment yield this evolution of development thought describes a conceptual framework that can guide development practitioners in prioritizing sequencing characterizing all interventions aimed at reducing poverty

provides evidence of a problem with the influential testing and assessment of solow's 1956 growth model proposed by mankiw et al 1992 and a series of papers evaluating the latter first the assumption of a common rate of technical progress maintained by mankiw et al 1992 is relaxed solow's model is extended to include the different levels and rates of technical progress of each country this increases the explanatory power of the cross country variation in income capital of the oecd countries to over 80 the estimates of the parameters are statistically significant and take the expected values and signs second the estimates merely reflect a statistical artifact this has serious implications for the possibility of actually testing solow's growth model illus

the measurement of willingness to pay for electricity relies critically on a reliable estimate of the demand for electricity function empirical work tends to assume that the demand for electricity has no satiation point many electricity demand models assume a constant price elasticity which implies infinite demand at low prices this report proposes a plausible functional form for the demand of electricity the proposed functional form is consistent with two properties of electricity demand functions for households firms namely the negative relationships between price quantity the finiteness of demand at zero price the report also demonstrates that this functional form of the demand function leads to easily estimable economic benefits of electricity

examines the role of infrastructure development and technical change in explaining increases in agricultural production and changes in land use in the mekong delta region of viet nam during the mid 1990s the transportation costs involved in moving agricultural input and output between farms and markets significantly effect farm land use and production decisions greater transport costs reduce the likelihood that farms adopt intensive cropping patterns or cultivate non rice crops results suggest that the quality of local water management infrastructure is much more important than transport costs in explaining the increased intensity of land use and level of production observed in the mekong delta during the

1990s illustrations

developing countries esp the least developed ones have more to learn from social policies in europe during the early 20th cent than from the elaborate welfare state arrangements after ww2 in addition to macro economic growth and stability the main ambitions must be to fight human deprivation incl illiteracy malnutrition and poor access to water and sanitation in some cases also weak incompetent and or corrupt governments informal systems in the fields of transfers and social services must not be destroyed when developing countries embark on more formal systems the european experience also warns against the creation of social systems that are so generous that disincentives and receding social norms distort the nat economy

in joining the assoc of southeast asian nations asean and asean free trade area cambodia lao pdr myanmar and viet nam have agreed to comply with the common effective preferential tariff cept scheme which reduces intra asean tariff rates on certain imports and may reduce gov t revenue this study proposes tax structure and tax admin reforms and other policies that can be introduced to enhance revenue collection they can strategically allocate goods among the four cept scheme lists improve their tax systems by replacing traditional general sales taxes with value added tax reduce inefficiencies that impede tax collection and discourage tax avoidance and evasion and reduce corruption among tax officials

customs valuation commodity classification system and rules of origin are the three basic customs laws rules to determine a country of origin or nationality of a country of production of goods are called rules of origin they are widely used in international trade in the application of different tariffs trade remedy measures tariff quotas and trade statistics with the globalization of economic activities resulting in outsourcing of materials as well as the global proliferation of free trade agreements rules of origin have become one of the major trade issues among both public and private sectors rules of origin often result in the so called spaghetti bowl effect since there is no agreement on product specific harmonized rules of origin international trade both preferential and nonpreferential is governed by different national laws this paper intends to describe key conceptual aspects of rules of origin focusing on lessons learned on origin criteria under the generalized system of preferences as well as from the efforts of the world customs organization and world trade organization to harmonize different origin rules
