vol for 1955 includes an issue with title product design handbook issue 1956 product design digest issue 1957 design digest issue

this is the tenth edition 1954 of k d wood s airplane design despite its age it is the favorite of amateur aircraft designers because it sits on the cusp between propeller driven low subsonic airplanes and the huge increase in military performance represented by supersonic and hypersonic aircraft and in commercial value represented by high subsonic jet propelled airliners it is also situated inside the early heroic period of helicopter development and wood s knowledge of that then exotic aircraft comes out clearly he still includes wood as an aircraft material and geodetic structures and tube trusses as structural arrangements without neglecting the monocoque and semi monocoque metal structures that were then becoming more common he also covers seaplanes and flying boats a topic essentially ignored today he recognizes the potential of fiber reinforced plastics and discusses them to the extent possible at the time this is the companion volume to k d wood s technical aerodynamics third edition this improved facsimile reprint has a new detailed table of contents accurate pagination and improvements to some of the illustrations
