i have spent the better part of the last 53 years taking well over a thousand multiple choice tests as a teenager i struggled through high school armed with an average iq and some fairly significant learning disabilities i barely graduating with a 1.4 grade point average however i was smart enough to figure out early on that much of academics and that achieving success in academics had far more to do with the ability to master multiple choice tests than raw intellect from there i began a 35 year study on the art and science of passing mastering and scoring high on multiple choice tests despite a very substandard high school gpa i scored high enough on the sat and the act to be accepted to the university of michigan one of the top academic institutions in the country upon graduation from college i

accepted a commission as an officer in the united states marine corps as a marine officer i completed dozens of military and civilian schools including a masters degree from boston university and a juris doctor degree from the university of detroit school of law in fact i earned a full ride military scholarship to law school based primarily on the fact i scored so highly on the law school aptitude test 98th percentile upon completion of law school i passed the michigan bar exam on the first attempt scoring 149 points on the multistate the multiple choice portion of the exam which was one question away from automatic passage at 150 they examiners do not need to grade the essay portion i have also taken and applied many of the marine corps concepts of discipline and mental toughness to the art of preparing for taking and passing multiple choice tests resigning my commission and leaving the marine corps in 1990 i continued both my education as well as honing my test taking skills i currently hold 12 professional licenses and 5 professional designations which required me to pass several comprehensive and difficult multiple choice examinations i have also attended dozens of professional test preparation courses from those courses i have cherry picked all of the valuable lessons and test taking tips and have included those in this book one of the professional licenses i hold is a paramedic license as a paramedic i have gained a much greater understanding of the anatomy and physiology of test taking test taking is all about the central nervous system which of course includes the brain however as i explain in this book it is clear that the sympathetic and parasympathetic nervous systems have as much to do with passing and failing multiple choice tests as does the brain accordingly i have also applied many of those principals in this book

the multiple choice test question is a popular item format used for tests ranging from classroom assessments to professional licensure exams the popularity of this format stems from its administration and scoring efficiencies the most common multiple choice format consists of a stem that presents a problem to be solved accompanied by a single correct answer and two three or four incorrect answers a well constructed item using this format can result in a high quality assessment of an examinee s knowledge skills and abilities however for some complex higher order knowledge skills and abilities a single correct answer is often insufficient test developers tend to avoid using multiple correct answers out of a concern about the increased difficulty and lower discrimination of such items however by avoiding the use of multiple correct answers test constructors may inadvertently create validity concerns resulting from incomplete content coverage and construct irrelevant variance this study explored an alternative way of implementing multiple choice questions with two or more correct answers by specifying in each question the number of answers examinees should select instead of using the traditional guideline to select all that apply this study investigated the performance of three operational exams that use a standard multiple choice format where the examinees are told how many answers they are to select the collective statistical performance of multiple choice items that included more than one answer that is keyed as correct was compared with the performance of traditional single answer multiple choice sa items within each exam the results indicate that the multiple answer multiple choice ma items evaluated from these three exams performed at least as well as to the single answer questions within the same exams
