critique and crisis established reinhart koselleck s reputation as the most important german intellectual historian of the postwar period this first english translation of koselleck s tour de force demonstrates a chronological breadth a philosophical depth and an originality which are hardly equalled in any scholarly domain it is a history of the enlightenment in miniature fundamental to our understanding of that period and its consequences like tocqueville koselleck views enlightenment intellectuals as an uprooted unrealistic group of onlookers who sowed the seeds of the modern political tensions that first flowered in the french revolution he argues that it was the

split that developed between state and society during the enlightenment that fostered the emergence of this intellectual elite divorced from the realities of politics koselleck describes how this disjunction between political authority proper and its subjects led to private spheres that later became centers of moral authority and eventually models for political society that took little or no notice of the constraints under which politicians must inevitably work in this way progressive bourgeois philosophy which seemed to offer the promise of a unified and peaceful world in fact produced just the opposite the book provides a wealth of examples drawn from all of europe to illustrate the still relevant message that we evade the constraints and the necessities of the political realm at our own risk critique and crisis is included in the series studies in contemporary german social thought edited by thomas mccarthy

in this major work one of our leading historians offers a new account of the origins of new zealand how pakeha settlers nurtured on enlightenment thought and evangelical humanitarianism encountered maori and how the two peoples together developed a distinctively experimental society with james cook s arrival in 1769 and the subsequent colonisation new zealand became one of the few post enlightenment experiments in creating a new nation anywhere in the world the europeans who settled these islands brought with them a belief in the power of reason and experience to improve peoples and societies encounters between maori and these new arrivals profoundly shaped the thoughts and behaviours of both peoples olssen argues that the people who settled new zealand planned two experiments in making a better society they hoped that in contrast to earlier colonial projects the indigenous new zealanders would not be driven to extinction but eventually take their place as equals in a modern commercial society and they aimed to create a society that was fairer and more just than the one they had left behind a better britain while both experiments were first conceived by savants and philosophers they gained ongoing support by lodging in the hearts and minds of the settlers whalers and

missionaries mothers and farmers in turn maori adapted these new ideas to their own ends giving up slavery and inter tribal warfare and adapting the institutions of the colonisers in ways that would re define the experiments this then is an ethnography of tangata pakeha a people of european descent changed by their encounters with tangata maori and their land just as maori were themselves changed and the story of the society they built together ranging across intellectual and cultural history from the beach at paihia to the coffee houses of paris olssen enables us to understand the origins of new zealand anew
