we were asked by hq usaf let to develop a method of establishing requirements for light forklifts 4k and 6k used in air freight terminals table of allowance ta 010 prescribes peacetime allowances for 4k and 6k forklifts at air freight terminals allowances are determined subjectively however contingency and wrm forklift allowances are not addresses in ta 010 the methods currently used to determine allowances in ta 010 and actual requirements can result in the wrong number of light forklifts in our freight terminals too few forklifts can contribute to bottlenecks and backlogs too many forklifts can needlessly waste resources we developed a model on the x 100 microcomputer to replace the subjective method of determining light forklift requirements by inputting a range of variables the local freight terminal manager can describe the specific workload either peacetime or wartime and the work environment the model can also be used by the major command

to verify base level requirements contingency planning and wartime requirements can be computed as often as needed to reflect changes in projected cargo flow
