for zoology degree level students a few chapters e g microscope and chromatography have been included afresh besides these a few dissections several museum specimens and permanenet slides have also been added at appropriate places

this is a major new textbook that is intended to lead students away from purely descriptive zoology courses into an experimental approach that emphasizes asking and answering questions about nature the book gives a panoramic view of vertebrate life classification ecology and behaviour section i of the book

describes the major groups of vertebrates and their origins the second section covers classification and its methodology section iii describes the ecology of vertebrates from two standpoints how individuals cope with environmental extremes and principles of population and community ecology as illustrated by experiments carried out in the field section iv describes the geographic distribution of vertebrates the fifth section discusses migration vertebrate behaviour is the subject of the final section and covers observations and the theories and experiments they have inspired

1 introduction to phylum chordata 2 study of museum specimens 3 wonder vertebrate animals 4 preparation of fixatives stains and other reagents 5 general method of microscopic preparations 6 microtomy 7 preparations of permanent stained slides mountings 8 study of histological slides 9 study of embryological slides 10 comparative osteology study of bones 11 dissections major and minor 12 experimental biochemistry and physiology 13 some important histochemical tests 14 experimental cytology 15 study of drosophila and human chromosomes 16 experimental ecology 17 experimental endocrinology 18 practicals on evolution and animal behaviour 19 viva voce

this is a new release of the original 1938 edition

excerpt from illustrations of zoology invertebrates and vertebrates this book is a companion to a course of systematic zoology the need of such a book has become obvious to us from some years of teaching the study of class types now a part of every systematic course is already well provided for by professor rolleston s forms of animal life and the many books that have modelled themselves upon it the zoological laboratory too is not without its many and admirable text books there is room however and need for a form of book such as we offer to the public in these illustrations of zoology in it the student will find illustrated by diagram or drawing the structure of forms selected from all the great classes of vertebrates and invertebrates and the illustrations arranged in systematic order our design is to help the student of comparative anatomy in the most important and the most difficult part of a systematic course of lectures in dealing with the vertebrates we could have wished to illustrate types of all the orders as well as of the classes but to have done this would have made the book larger and more expensive without making it proportionally more useful besides the general text books as a rule give with a fair degree of fulness the chief features of the vertebrate orders about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
