leon krier is one of the best known and most provocative architects and urban theoreticians in the world until now however his ideas have circulated mostly among a professional audience of architects city planners and academics in the architecture of community krier has reconsidered and expanded writing from his 1998 book architecture choice or fate here he refines and updates his thinking on the making of sustainable humane and attractive villages towns and cities the book includes drawings diagrams and photographs of his built works which have not been widely seen until now

traces american architecture from 1600 includes a discussion of the nature of architecture

rooted in the idea that architecture and interior design have the power to influence how we feel and that we are for better and for worse different people in different buildings this book suggests how we might learn to build better more attractive dwellings in which we would stand a higher chance of happiness

h h richardson was born into the architectural chaos of the mid eighteen hundreds and dies in the architectural revolution of the age of the skyscraper yet his genius and reputation were able to surmount the first and survive the latter this is a study of his architecture and of the setting in which he worked it includes detailed discussions of the social economic and technical history of the era and examines the architecture of richardson s contemporaries and of those countries in which he traveled and lived his heritage was the romantic generation that had contemptuously renounced the austerity of the classical revival and in the search for stylistic stimulation had borrowed indiscriminately from the rich bazaar of historic and exotic styles the gothic italianate norman byzantine by the time richardson had completed his education at harvard and at the École des beaux arts this mixed architectural diet had played havoc with the american taste in his maturity he developed a personal style that resolved the dilemma in which he found himself his own good taste and judgment demanded utility spatial tangibility function his public demanded pictorial surface effects his reconciliation of these disparities resulted in his finest works trinity church boston the marshall field wholesale store chicago the allegheny county courthouse and jail pittsburgh sever hall cambridge at the time of his death technological advances had made the skyscraper feasible and in the succeeding years architectural form was virtually dictated by these advances richardson s mastery of traditional composition mortar polychromy and ornament was largely forgotten today in the search for aesthetic

expression of fine materials and integral ornament richardson s work is relevant once more for practical as well as historical purposes

the author here presents an architectural history of paris stretching from the 3rd century bc up until the end of the 20th century

most monumental buildings of france s global empire such as the famous saigon and hanoi opera houses were built in south and southeast asia much of this architecture and the history of who built it and how has been overlooked the

architecture of empire considers the large scale public architecture associated with french imperialism in seventeenth and eighteenth century india siam and vietnam and nineteenth and twentieth century indochina the largest colony france ever administered in asia offering a sweeping panorama of the buildings of france's colonial project this is the first study to encompass the architecture of both the ancien régime and modern empires from the founding of the french trading company in the seventeenth century to the independence and nationalist movements of the mid twentieth century gauvin bailey places particular emphasis on the human factor the people who commissioned built and lived in these buildings almost all of these architects both europeans and non europeans have remained unknown beyond at best their surnames through extensive archival research this book reconstructs their lives providing vital background for the buildings themselves much more than in the french empire of the western hemisphere the buildings in this book adapt to indigenous styles regardless of whether they were designed and built by european or non european architects the architecture of empire provides a unique comprehensive study of structures that rank among the most fascinating examples of intercultural exchange in the history of global empires

every age and every culture has relied on the incorporation of mathematics in their works of architecture to imbue the built environment with meaning and order mathematics is also central to the production of architecture to its methods of measurement fabrication and analysis this two volume edited collection presents a detailed portrait of the ways in which two seemingly different disciplines are interconnected over almost 100 chapters it illustrates and examines the relationship between architecture and mathematics contributors of these chapters come from a wide range of disciplines and backgrounds architects mathematicians historians theoreticians scientists and educators through this work architecture may be seen and understood in a new light by professionals as well as non professionals volume ii covers architecture from the late renaissance era through baroque ottoman enlightenment modern and contemporary styles and approaches key figures covered in this volume include palladio michelangelo borromini sinan wren wright le corbusier breuer niemeyer and kahn mathematical themes which are considered include linear algebra tiling and fractals and the geographic span of the volume's content includes works in the united states of america and australia in addition to those in europe and asia

ethics is one of the most important and least understood aspects of design practice in his latest book thomas fisher shows how ethics are inherent to the making of architecture and how architecture offers an unusual and useful way of looking at ethics the architecture of ethics helps students in architecture and other design disciplines to understand the major

approaches to ethics and to apply them to the daily challenges they face in their work the book covers each of the four dominant approaches to ethics virtue ethics social contract ethics duty ethics and utilitarian ethics each chapter examines the dilemmas designers face from the perspective of one of these categories written in an accessible jargon free style the text also features 100 illustrations to help integrate these concepts into the design process and to support visual understanding ethics is now a required part of accredited architecture programs making this book essential reading for all students in architecture and design

in the aftermath of world war ii the united states experienced a rapid expansion of church and synagogue construction as part of a larger religious boom the synagogues built in that era illustrate how their designs pushed the envelope in aesthetics and construction the design of the synagogues departed from traditional concepts embraced modernism and innovations in building technology and evolved beyond the formal rational style of early 1950s modern architecture to more of an expressionistic design the latter resulted in abstraction of architectural forms and details and the inclusion of jewish art in the new synagogues the architecture of modern american synagogues 1950s 1960s introduces an architectural analysis of selected modern american synagogues and reveals how they express american jewry's resilience in continuing their physical and spiritual identity while embracing modernism american values and landscape in addition the book contributes to the discourse on preserving the recent past e g mid 20th century architecture while most of the investigations on that topic deal with the brick mortar challenges this book introduces preservation issues as a function of changes in demographics in faith rituals in building codes and in energy conservation as an introduction or a reexamination the architecture of modern american synagogues 1950s 1960s offers a fresh perspective on an important moment in american jewish society and culture as reflected in their houses of worship and adds to the literature on modern american sacred architecture the book may appeal to jewish congregations architects preservationists scholars and students in fields of studies such as architectural design sacred architecture american modern architecture and building technology post wwii religious and jewish studies and preservation and conservation
