teacher education seeks to transform prospective and or practicing teachers from neophyte possibly uncritical perspectives on teaching and learning to more knowledgeable adaptable analytic insightful observant resourceful reflective and confident professionals ready to address whatever challenges teaching secondary mathematics presents this transformation occurs optimally through constructive engagement in tasks that foster knowledge for teaching secondary mathematics ideally such tasks provide a bridge between theory and practice and challenge surprise disturb confront extend or provoke examination of alternatives drawn from the context of teaching we define tasks as the problems or activities that having been developed evaluated and refined over time are posed to teacher education participants such participants are expected to engage in these tasks collaboratively energetically and intellectually with an open mind and an orientation to future practice the tasks might be similar to those used by classroom teachers e g the analysis of a graphing problem or idiosyncratic to teacher education e g critique of videotaped practice this edited volume includes chapters based around unifying themes of tasks used in secondary mathematics teacher education these themes reflect goals for mathematics teacher education and are closely related to various aspects of knowledge required for teaching secondary mathematics they are not based on the conventional content topics of teacher education e g decimals grouping practices but on broad goals such as adaptability identifying similarities productive disposition overcoming barriers micro simulations choosing tools and study of practice this approach is innovative and appeals both to prominent authors and to our target audiences

what is knowledge how hard is it for a person to have knowledge good knowledge bad knowledge confronts contemporary philosophical attempts to answer those classic questions by identifying and arguing against two fundamental epistemological presumptions can there be both better and worse knowledge of some fact can you improve your

knowledge of a particular fact can there be especially bad knowledge of a specific fact epistemologists routinely answer these questions with a resounding no but stephen hetherington argues that those standard answers are mistaken the result is a theory of knowledge that is unique in conceiving of knowledge in a non absolutist way the theory offers new solutions to many traditional epistemological puzzles including various kinds of scepticism the gettier challenge and the problem of the criterion it also offers a fresh way of using g e moore s anti sceptical gambit along with reinterpretations of the epistemic roles of fallibility luck relevance and dogmatism and what can we know about knowledge the role of intuition in shaping epistemological thought about knowledge is critically examined anyone working on epistemology will enjoy this original and challenging work

this book asks fundamental questions about the extent to which india is participating in the global shift towards knowledge based forms of competitiveness it charts indian performance and progress using a unique framework benchmarked against fourteen other countries in the course of the analysis critical areas for improvement are identified and the book provides detailed and objective insights for policy makers and researchers to facilitate change and institutional reform in india readers will derive a comprehensive understanding of india s performance and prospects as it emerges as a serious global economic player a particular feature of the work is the development of an original knowledge footprint concept that measures the extent and impact of knowledge development and diffusion domestic and internationally the views expressed in this book are the author s
