this text provides students with the information needed to properly assess childhood language disorders and decide appropriate treatments the book covers language development from birth to adolescence

a short inexpensive nuts and bolts text on how to write construct and use assessments in the classroom can be used as supplement in an ed psych or methods course where assessment is given more than cursory treatment

the focus of this study is on the participation rates of girls in senior level mathematics and physical science courses rather than on achievement it also emphasizes differences between boys and girls and how gender shapes a decision about whether or not to enrol in a subject area such as algebra or physics it looks at the girls and boys own constructions of their reasons for enrolling or not enrolling in the courses finally it focuses on secondary schools

the purpose of this investigation was to examine the ways in which class size affected other facets of the educational environment of the classroom the study focused on the commonly found positive relationship between class size and achievement the most plausible explanation of the evidence seems to involve the effects of grouping more able students in larger classes but the findings also indicated achievement gains beyond those expected solely from a consideration of differences in achievement levels it is clear that an increased understanding of these features of the classroom is a necessary step towards sorting out the relationships between class size teacher activities and student motivation all of which appear as central themes in the class size question jd
