books about thinkers require a kind of unity that their thought may not possess this cautionary statement is especially applicable to mikhail bakhtin whose intellectual development displays a diversity of insights that cannot be easily integrated or accurately described in terms of a single overriding concern indeed in a career spanning some sixty years he experienced both dramatic and gradual changes in his thinking returned to abandoned insights that he then developed in unexpected ways and worked through new ideas only loosely related to his earlier concerns small wonder then that bakhtin should have speculated on the relations among received notions of biography unity innovation and the creative process unity with respect not only to individuals but also to art culture and the world generally is usually understood as conformity to an underlying structure or an overarching scheme bakhtin believed that this idea of unity contradicts the possibility of true creativity for if everything conforms to a preexisting pattern then genuine development is reduced to mere discovery to a mere uncovering of something that in a strong sense is already there and yet bakhtin accepted that some concept of unity was essential without it the world ceases to make sense and creativity again disappears this time replaced by the purely aleatory there would again be no possibility of anything meaningfully new the grim truth of these two extremes was expressed well by

borges an inescapable labyrinth could consist of an infinite number of turns or of no turns at all bakhtin attempted to rethink the concept of unity in order to allow for the possibility of genuine creativity the goal in his words was a nonmonologic unity in which real change or surprisingness is an essential component of the creative process as it happens such change was characteristic of bakhtin s own thought which seems to have developed by continually diverging from his initial intentions although it would not necessarily follow that the development of bakhtin s thought corresponded to his ideas about unity and creativity we believe that in this case his ideas on nonmonologic unity are useful in understanding his own thought as well as that of other thinkers whose careers are comparably varied and productive

in the renaissance and early modern periods there were lively controversies over why things happen central to these debates was the troubling idea that things could simply happen by chance in france a major terrain of this intellectual debate the chance hypothesis engaged writers coming from many different horizons the ancient philosophies of epicurus the stoa and aristotle the renewed reading of the bible in the wake of the reformation a fresh emphasis on direct empirical observation of nature and society the revival of dramatic tragedy with its paradoxical theme of the misfortunes that befall relatively good people and growing introspective awareness of the somewhat arbitrary quality of consciousness itself this
