summary of how to avoid a climate disaster there are two numbers you need to know when it comes to understanding climate change the first is fifty billion the number of greenhouse gasses we release into the atmosphere the second is zero the number of greenhouse gasses we need to release in the atmosphere to avoid catastrophic climate change problems by working together gates thinks we can reach these lofty goals gates began by looking at per capita income as it related to energy uses and found that the higher the per capita income of a country the higher the amount of energy that country used since energy consumption equaled about 27 of the greenhouse gasses emitting this would be an important part of the puzzle but it wouldn t be the only part gates developed three beliefs about energy consumption and climate change first to avoid a climate disaster we have to get down to zero greenhouse gasses second we need to employ the tools we have like wind and solar energy smarter and faster third we need to find new technology that can take us the rest of the way to solve the energy crisis we have to start by investing in clean energy and getting money out of the fuel oil and coal industries money speaks and if we can make it so that its financially beneficial to switch to clean energy then we may see those greenhouse gases eliminated for a long time people have

said that we need to fly and drive less to decrease the number of greenhouse gases that enter our atmosphere however as the covid 19 pandemic hit globally we found people doing just that but our rates of carbon emissions only went down about 5 this would be a significant amount of it was sustainable and each year saw similar decreases however it is not significant enough to prevent climate disasters this book will not only tell you how to best use the energy you have and how to create clean energy in your homes but it will also tell you what plans to follow to help prevent disastrous climate change and some of the newest technological ideas that are primed to help make a huge difference here is a preview of what you will get a full book summary an analysis fun quizzes quiz answers etc get a copy of this summary and learn about the book

the 1 hack for smarter marketing we all want new answers and new solutions for the very real and pressing challenges that our organizations face new things to point to and talk about new ways of working and new ways of thinking that might just be better than the old ways but rather than this endless search for a brilliant and novel solution why don't you just copy something that's worked before mark earls leading expert in marketing and consumer behaviour quashes the stigma around copying and shows that it can help us to rethink how we go about solving problems by understanding what other people are doing and the choices they make we can develop strategies to solve the challenges that we face inside and outside the organization based on extensive research and proven examples copy copy copy provides over 50 strategies that you can use right away to copy borrow or steal as the basis for better ideas faster if it's good enough for elvis newton shakespeare the british olympic cycling team and great ormond street hospital isn't it good enough for you this delightful book argues convincingly that transferring ideas usually produces greater value than cooking them up from scratch and then shows you how rory sutherland vice chairman ogilvy london and the spectator magazine's wikiman yet

another entertaining handbook from the acclaimed herdmeister for anyone involved in marketing behavioural change and understanding why we all make the choices we make earls convincingly disrupts convention about what is innovation though praxis this is jammed with great case studies and 52 actionable strategies stephen maher chairman the marketing society and ceo mba yet again this leading british business thinker has got us to see the world we inhabit today in fresh and mind altering ways a book which marries theory and practice better than the vast majority out there most of all his message of copying one s way to greatness is entertaining counter intuitive and fun david abraham ceo channel 4 plc

intended for college level physics engineering or mathematics students this volume offers an algebraically based approach to various topics in applied math it is accessible to undergraduates with a good course in calculus which includes infinite series and uniform convergence exercises follow each chapter to test the student s grasp of the material however the author has also included exercises that extend the results to new situations and lay the groundwork for new concepts to be introduced later a list of references for further reading will be found at the end of each chapter for this second revised edition professor dettman included a new section on generalized functions to help explain the use of the dirac delta function in connection with green s functions in addition a new approach to series solutions of ordinary differential equations has made the treatment independent of complex variable theory this means that the first six chapters can be grasped without prior knowledge of complex variables however since chapter 8 depends heavily on analytic functions of a complex variable a new chapter 7 on analytic function theory has been written

this new edition aims to guide undergraduate students through the first year of their mathematics course it provides a rigorous introduction to analysis which takes into account the difficulties students often face when making the transition from a level mathematics to this higher level plenty of examples are provided some of which have full detailed solutions and others which encourage the student to discover and investigate the ideas themselves hints are provided but the book aims to build confidence and understanding in all topics this second edition has two new substantial chapters covering integration and powere series and is updated throughout taking into account changes in notation
