fundamentals of fire protection for the safety professional provides safety managers with a guide for incorporating fire hazard awareness and protection into their safety management plans industrial fires pose one of the greatest threats to organizations in terms of financial human and property losses understanding fire safety basics the physics of fire and the properties and classes of common hazards

is key to designing fire safety management programs that not only protect an organization's assets but also ensure the safe evacuation of all involved. Fundamentals of fire protection for the safety professional takes an in-depth look at fire hazards in the workplace from the substances required to do business to the building construction itself and provides practical fire safety principles that can be applied in any work environment. Readers will learn how to develop emergency action plans and fire prevention plans, implement effective alarm and detection systems and fire extinguishment systems, and develop a comprehensive fire program management plan that is in compliance with federal emergency management agency, occupational safety and health administration, environmental protection agency, and national fire protection association standards. Each chapter includes a chapter summary and sample problems, making this an ideal training tool in the workplace or the classroom. Answers to chapter questions and a comprehensive glossary and index are provided at the end of the book.

In January 1976, a Chicago nursing home fire killed 23 people within a week. Another nursing home fire just outside Chicago claimed the lives of eight people. In his letter of February 20, 1976, the chairman, Subcommittee on Health and Long-Term Care, House Select Committee on Aging, asked us to investigate reasons for the severity of the fires and to suggest possible actions to avoid similar situations. He also asked us to investigate:

1. the fires and determine if automatic sprinkler systems would have put out the fires or lessened their severity in these facilities
2. the facilities in Chicago and determine if they met the life safety code requirements for participation in federally financed health programs
3. the Department of Health, Education and Welfare's enforcement of fire safety standards in Chicago and elsewhere
4. the state inspections of the Chicago facilities in question and HEW's validation of those inspections
5. the state inspection procedures including the qualifications of the inspectors
6. the quality of trained personnel assisting patients during the fires
7. the implementation of Public Law 93-204, approved December 28, 1973, which authorized federally insured loans to provide fire safety equipment for nursing homes and intermediate care facilities.

in 2003 31 residents died in nursing home fire in hartford ct nashville tn federal fire safety standards enforced by the centers for medicare medicaid services cms did not require either home to have automatic sprinklers even though they have proven very effective in reducing the number of multiple deaths from fires the gao was asked to report on 1 the rationale for not requiring all homes to be sprinkled 2 the adequacy of federal fire safety standards for nursing homes that lack automatic sprinklers 3 the effectiveness of state federal oversight of nursing home fire safety gao makes several recommendations to the administration of cms charts tables

the consumer product safety commission has broad regulatory authority over thousands of consumer products mandatory safety standards for matchbooks aluminum wire systems and television receivers are being developed or planned under the consumer product safety act and two other standards will have significant fire safety aspects regulation under the flammable fabrics act has resulted in mandatory standards for children s sleepwear clothing carpets and rugs and mattresses
