in this third book in the series on the tigray war 2020 2022 the focus shifts to the devastating consequences of the siege and communication blackout imposed during the war which plunged the region into a digital black hole the war's invisible nature at a time when international support was most crucial posed immense challenges for researchers humanitarian organisations and healthcare workers trying to address the growing crisis the extreme assault on tigray's healthcare system during the war is highlighted with eritrea identified as a major perpetrator able to commit atrocities with impunity due to its hidden role despite these hardships this book also illuminates the remarkable courage and resilience of the people of tigray it explores how in the face of adversity they remained focused committed and innovative developing new ways to stay connected and communicate even in isolation through these stories of agency the book sheds light on the ingenuity and creativity that emerged in the midst of profound hardship demonstrating the unyielding spirit of the people of tigray

how and when should we end a war what place should the pathways to a war's end have in war planning and decision making this volume treats the topic of ending war as part and parcel of how wars begin and how they are

fought a unique complex problem worthy of its own conversation new essays by leading thinkers and practitioners in the fields of philosophical ethics international relations and military law reflect on the problem and show that it is imperative that we address not only the resolution of war but how and if a war as waged can accommodate a future peace the essays collectively solidify the topic and underline its centrality to the future of military ethics strategy and war

this book provides a thorough critical overview of the current debate on the ethics of war as well as a modern just war theory that can give practical action guidance by recognizing and explaining the moral force of widely accepted law traditionalist walzerian and revisionist approaches have dominated contemporary debates about the classical jus ad bellum and jus in bello requirements in just war theory in this book uwe steinhoff corrects widely spread misinterpretations of these competing views and spells out the implications for the ethics of war his approach is unique in that it complements the usual analysis in terms of self defense with an emphasis on the importance of other justifications that are often lumped together under the heading of lesser evil it also draws on criminal law and legal scholarship which has been largely ignored by just war theorists ultimately steinhoff rejects arguments in favor of moral fundamentalism the view that the laws and customs of war must simply follow an immutable morality in contrast he argues that widely accepted laws and conventions of war are partly constitutive of the moral rules that apply in a conflict the ethics of war and the force of law will be of interest to scholars and advanced students working in just war theory applied ethics political philosophy political theory philosophy of law and criminal and military law

the most terrible disaster that one group of human beings can inflict on another is war wars cause misery on an indescribable scale yet we go on doing it to one another generation after generation why warfare is a recurrent and

universal characteristic of human existence the mythologies of practically all peoples abound in wars and the superhuman deeds of warriors and pre literate communities apparently delighted in the recital of stories about battles since our species became literate a mere 5 000 years ago written history has mostly been the history of wars thousands who knew war evidently sickened of it and dreamt of lasting peace expressing their vision in literature and art in philosophy and religion they imagined utopias freed of martial ambition and bloodshed which harked back to the golden age of classical antiquity to the christian vision of a paradise lost and to the arcadia of greek and latin poetry so richly celebrated in the canvases of claudel and poussin all these things bear eloquent testimony to the human longing for peace but they have not triumphed over our dreadfully powerful propensity to war from the introduction by anthony stevens in this multi disciplinary collection of essays on the manifestations of war in poetry fiction drama music and documentaries scholars and practitioners from an international context describe the transformation of the war experience into chronicles of hope and despair from herodotus up to the present day
