this book presents a comprehensive description of the physics of free electron lasers starting from the fundamentals and proceeding through detailed derivations of the equations describing electron trajectories and spontaneous and stimulated emission linear and nonlinear analyses are described as are detailed explanations of the nonlinear simulation of a variety of configurations including amplifiers oscillators self amplified spontaneous emission high gain harmonic generation and optical klystrons theory and simulation are anchored using comprehensive comparisons with a wide variety of experiments

this book is an informal readable introduction to the basic ideas of thermal physics it is aimed at making the reader feel comfortable with the extremum principles of entropy and free energies there is a repeating theme molecules spins do x to maximize their entropy and molecules spins do xx to minimize their free energy this finally leads to the idea of the landau ginzburg free energy functional the author illustrates how powerful the idea is by using two examples from phase transitions

this book presents a comprehensive description of the physics of free electron lasers starting from the fundamentals and proceeding through detailed derivations of the equations describing electron trajectories and spontaneous and stimulated emission linear and nonlinear analyses are described as are detailed explanations of the nonlinear simulation of a variety of configurations including amplifiers oscillators self amplified spontaneous emission high gain harmonic generation and optical klystrons theory and simulation are anchored using comprehensive comparisons with a wide variety of experiments

this book is constructed around great thinkers of the past and present who have been influential in developing the philosophy of freedom its main purpose is to provide a survey and overview of the ideas of leading individual philosophers and economists of capitalism who have contributed to developing what might be called the classical liberal or libertarian worldview champions of a free society endeavors to provide a guide to political and economic thinking about the desirability and construction of a free society that is intelligible to the educated layperson edward younkins provides an historical perspective of the pursuit of political and economic truth the goal of this book is to present the development of ideas in language that permits generally educated readers to understand and appreciate their significance the book s chronological approach considers the thinkers and their ideas as they have developed over the course of time there is much unfulfilled

illuminative potential to be found in the ideas of the past and younkins successfully integrates the ideas of past and current thinkers into a logical contemporary worldview

there is much controversy about the dangers of a free media when it comes to children and adolescents many believe that this constitutional right should be amended altered or revoked entirely to prevent the young from being negatively influenced graphic violence sexual content and the depiction of cigarette smoking have all come under fire as being unacceptable in media that is geared toward adolescents from television and movies to magazines and advertising yet not much has been written about the developmental science behind these ideas and what effects a free media really has on adolescents this book presents a synthesis of all current knowledge about the developmental effects of a free media on adolescents levesque first presents a full analysis of research studies into the media s effects on adolescents in four key areas sexuality violence smoking and body image all findings are assessed within the context of normal adolescent development levesque then discusses how this knowledge can be used to inform current standards for the regulation of free speech with regard to adolescents both legal restrictions and less formal regulatory bodies schools parent groups etc are reviewed to present a full picture of the ways in which a free media is constrained to protect adolescent s development
