- Clear labeling with consistent terminology aligned with international standards, reducing confusion for learners worldwide.
- Multiple views (anterior, posterior, lateral, cross-sectional) to provide comprehensive spatial understanding. The illustrations balance artistic clarity with scientific precision, making complex structures accessible without sacrificing detail.

User Interface and Organization The layout is logically structured, with sections divided into regions of the body: head and neck, thorax, abdomen, pelvis, limbs, etc. Key features include:

- Color-coded chapters for easy navigation.
- Tabbed sections that allow quick access to different regions.
- Use of callouts and annotations to highlight important anatomical relationships and clinical relevance.
