the focus of this book is on algebro geometric solutions of completely integrable nonlinear partial differential equations in 1 1 dimensions also known as soliton equations explicitly treated integrable models include the kdv akns sine gordon and camassa holm hierarchies as well as the classical massive thirring system an extensive treatment of the class of algebro geometric solutions in the stationary as well as time dependent contexts is provided the formalism presented includes trace formulas dubrovin type initial value problems baker akhiezer functions and theta function representations of all relevant quantities involved the book uses techniques from the theory of differential equations spectral analysis and elements of algebraic geometry most notably the theory of compact riemann surfaces the presentation is rigorous detailed and self contained with ample background material provided in various appendices detailed notes for each chapter together with an exhaustive bibliography enhance the presentation offered in the main text

evolutionary computation algorithms are employed to minimize functions with large number of variables biogeography based optimization bbo is an optimization algorithm that is based on the science of biogeography which researches the migration patterns of species these migration paradigms provide the main logic behind bbo due to the cross disciplinary nature of the optimization problems there is a need to develop multiple approaches to tackle them and to study the theoretical reasoning behind their performance this book explains the mathematical model of bbo algorithm and its variants created to cope with continuous domain problems with and without constraints and combinatorial problems

the oxford handbook of thinking and reasoning brings together the contributions of many of the leading researchers in thinking and reasoning to create the most comprehensive overview of research on thinking and reasoning that has ever been available each chapter includes a bit of historical perspective on the topic and concludes with some thoughts about where the field seems to be heading
