the making of shadows is an act as old as architecture itself from the gloom of the medieval hearth through to the masterworks of modernism shadows have been an essential yet neglected presence in architectural history shadow makers tells for the first time the history of shadows in architecture it weaves together a rich narrative combining close readings of significant buildings both ancient and modern with architectural theory and art history to reveal the key places and moments where shadows shaped architecture in distinctive

and dynamic ways it shows how shadows are used as an architectural instrument of form composition and visual effect while also exploring the deeper cultural context tracing differing conceptions of their meaning and symbolism whether as places of refuge devotion terror occult practice sublime experience or as metaphors of the unconscious within a chronological framework encompassing medieval baroque enlightenment sublime picturesque and modernist movements a wide range of topics are explored from hawksmoor's london churches japanese temple complexes and the shade patterns of islamic cities to ruskin in venice and aldo rossi and louis kahn in the 20th century this beautifully illustrated study seeks to understand the work of these shadow makers through their drawings their writings and through the masterpieces they built

rethinking the baroque explores a tension in recent years the idea of baroque or the baroque has been seized upon by scholars from a range of disciplines and the term baroque has consequently been much in evidence in writings on contemporary culture especially architecture and entertainment most of the scholars concerned have little knowledge of the art literature and history of the period usually associated with the baroque a gulf has arisen on the one hand there are scholars who are deeply immersed in historical period who shy away from abstraction and who have remained often oblivious to the convulsions surrounding the term baroque on the other there are theorists and scholars of contemporary theory who have largely ignored baroque art and architecture this book explores what happens when these worlds mesh in this book scholars from a range of disciplines retrieve the term baroque from the margins of art history where it has been sidelined as anachronistic to reconsider the usefulness of the term baroque while avoiding simply rehearsing familiar policing of periodization stylistic boundaries categories or essence baroque emerges as a vital and productive way to rethink problems in art history visual culture and architectural theory rather than attempting to provide a survey of baroque as a chronological or geographical conception the essays here attempt critical re engagement with the term baroque its promise its limits and its overlooked potential in relation to the visual arts thus the book is posited on the idea that tension is not only inevitable but even desirable since it not only encapsulates intellectual divergence which is always as useful as much as it is feared but helps to push scholars and therefore readers outside their usual runnels
