this book documents those first links that students make between content
they learn in their classrooms and their prior experiences through six late
elementary school case studies these knowledge construction links are
brought to life the links of the students are often rich in describing who
these individuals are where they are in their learning process and what is
meaningful to them many times these links point to what has been learned
both in and out of school and the contexts when and where that learning
took place the mind as rhizome metaphor was used to guide the
development and interpretation of the studies while the lens of peircian
semiotics provides an interpretation for these initial links the resulting
grounded theory is presented through a rich and extensive presentation of
excerpts from classroom observations student interviews and a student
writing activity and describes the varying types of student links how the links
were prompted the relationships between what the students were learning
and what they already knew and specific types of in school links the

narrative includes how these links were supported or inhibited in the classroom drawing on the roles of the teachers in the classrooms and what constituted authority sources of information in those classrooms before exploring the students linking as a process of ongoing semiosis and how this process is part of a dynamic system a study of the relationship between student knowledge links and achievement is shared this rich narrative will be of interest to scholars and practitioners alike and includes an extensive appendix documenting the research methods
